

## Renewable Energy Anaerobic Digester

- Constructs an anaerobic digester facility to diversify energy sources, manage green waste, provide an alternate destination for portions of the campus waste stream, and lead the way to a more sustainable future.
- Delivery through agreement with a third party who will build and operate the facility for TBD length of time; at end of which, the Davis campus will have an opportunity to purchase the facility.
- Grant funding from Department of Energy (DOE) and California Energy Commission (CEC).
