

San Francisco

Long Hospital 4th Floor Hybrid Operating Room & IntraOperative MRI

- Provides two new operating rooms in Moffitt/Long Hospital that include imaging systems.
- Provides for OR 29, a new surgical suite that enables less invasive cardiac and vascular procedures and allows surgeons to implement new surgical procedures.
- Creates OR 29 out of existing storage space and includes significant infrastructure upgrades.
- Installs a 1.5 tesla MRI between Operating Rooms 7 and 8.
- The IntraOperative MRI serves primarily neurosurgery, with other future surgical or diagnostic uses anticipated.

Budget Approval

Budget Year 2013-14

Project Scope Summary

ASF 1,776
