

Riverside Mechanical Systems

950540

Fiscal Year: 2015-16

Project Description

- Repair and renovate mechanical systems (such as HVAC, vacuum systems, cold rooms, etc.) in 24 UCR state funded buildings and three Greenhouses.
- Replaces 27 year old, CFC containing central plant chiller that has reached the end of its expected life.
- Repairs general campus infrastructure systems (i.e., compressed air distribution system piping, chiller #2) more broadly serving UCR buildings housing a variety of state supportable instruction and research programs.
