

**UDIRSTU Interface File from
University Directory**

September 17, 2007

**Information Resources and Communications
Office of the President
University of California**

Overview

Population

The student UDIRSTU file contains NetID information on all persons whose standing, is that they have been accepted for admission by a campus up through and including their having been registered at a campus. The data will represent the “full volume” of data for the location, i.e., data on all applicable students will be passed on each submitted interface.

Record

The individual, detail-level student records do not contain a record type, given that each transmission represents a “full volume” interface.

Schedule

UCOP will supply this “full volume” file on a daily (Tuesday - Friday) basis.

Physical Characteristics

This file is to be made available to the secure FTP for retrieval by the campus (per the Guidelines for campuses to retrieve automated output files from UCOP via TCP/IP Utilizing secure FTP).

File Name: ftphome/ftpusr*n*/get/ess/UDIRSTU or
 ftphome/ftpusr*nn*/get/ess/UDIRSTU (for Labs)

Where *n* = indicates location (OP=U, BK=1, SF=2,
DV=3, LA=4, RV=5, SD=6, SC=7, SB=8, IR=9)

For Labs *nn* (LBL=LB, LLNL=LL, LANL=LN)

Record Length: 206

Sequence: Records in ascending sequence sorted by NetID.

note: Files will be submitted electronically from UCOP 4 days a week and should represent “full volume” interface files. Each transmission does not require an accompanying Email note with transmittal information.
