

August 2001
HRIS Follow-up Task Report

Return completed document to Judy.Thai@ucop.edu by August 30, 2001

ITEM #: <u>27</u>	Web enable PPS
-------------------	----------------

Team #: <u>5</u>	Reported by: Shelley Dommer/Kathy Keller
------------------	--

Definition Statement: Provide access through a web browser to EDB update, Control Table inquiry and update, Merit processing, PAN review, and report requests.

Note that web-based EDB Inquiry is already complete and being tested. Requirements for Merit processing are complete and programming is underway, and requirements for web-based PAN review are complete. PAR Inquiry is mentioned in item 27, but was determined to be outside the scope because it is a payroll function and would not be part of an HRIS package.

Cost estimates assume the web based entry/update applications would not just replicate current screen based applications, but would be task based. For example, instead of selecting an update of the Benefits Rates table and the GTN table, the user would be prompted to select an action: add a new medical plan, add a new union deduction, etc.

Re-engineering Required? Y/N: Y

Size/Scope (person months)	Small < 1 month	Medium 1-3 months	Large 3-6 months	Extra Large > 6 months	Super Size > 1 Year
Requirements Definition & Development					XXXX
Programming					XXXX
Campus Implementation				XXXX	

Comments/Risk Factors:
