

Known for its academic rigor, UC Davis provides students with a rewarding campus experience while preparing them for success after graduation. Students benefit from a wide range of academic and extracurricular programs, a learning community involved in national and global issues, and the resources and reputation of a world-renowned university. UC Davis draws students from every state and more than 75 countries, creating a student body that reflects diverse cultural traditions from around the world.

Founded in 1905 as the University Farm, Davis has emerged as an international leader in agricultural, biological, biotechnological and environmental sciences, and is gaining similar recognition for excellence in the arts, humanities, social sciences, engineering, health sciences, law and management. Offering programs in 15 different fields of engineering, the College of Engineering has the most accredited majors and the largest undergraduate engineering program in the UC system.

Nearly half of all undergraduates work side by side with faculty members on research projects. The Davis campus includes Shields Library – one of the top research libraries in North America – the 150-acre Davis Arboretum, and the California Regional Primate Research Center.

 School of Education
 School of Law
 School of Medicine
 School of Veterinary Medicine

Economic Impacts

UC Davis has a profound, positive impact on the long-term economic health of California and the Sacramento region with an economy already thriving on the knowledge and discoveries that result from scholarly and scientific research, a leading academic health system, and the brainpower of more than 6,000 graduates each year. UC Davis contributed at least \$2.7 billion to the California economy in 2001-02. For every state dollar invested in UC Davis, California got at least \$5 in return. UC Davis is the largest employer in the Sacramento region with nearly 29,000 employees, and UC Davis generates 45,000 jobs for the state. The UC Davis Medical Center treats over one million patients annually. The UC Davis campus hosts 1.8 million visitors each year. In 2001-02, UC Davis reported 98 new inventions and was issued 37 U.S. patents. The income and innovative ideas generated by UC Davis are powering today's economy and hold great future promise for the citizens of California. UC Davis is preparing the next generation of workers and leaders for a technological, global society; transferring cutting-edge research to a wide array of fields; providing public service that enhances the quality of life for all California residents; creating new jobs and attracting new revenue; and partnering with our community to bring the best of the university to its doorstep.
