

**Add the Work Study Program Code
to Web PAN Display**

Service Request 16915

February 18, 2003

Revised February 21, 2003

(to change the field label from 'WSP' to 'Work Study Program')

Final

Information Resources and Communications
Office of the President

Overview

Service Request 15213 asked that the CICS Post Authorization Notification (PAN) sub-system be enhanced and that a web-based PAN review application be developed. Payroll release 1415, dated June 12, 2002, addressed those enhancements.

Currently, the Work Study Program (WSP) code only appears on the CICS and email PAN. The Web PAN display does not include the WSP code. This was an oversight in the original requirements. These requirements specify the addition of the WSP code to the Appointments and Distributions section of the Post Authorization Notification Detail screen of the Web PAN.

Web PAN Modifications

The field label 'Work Study Program' should be added to the Appointments and Distributions section of the Post Authorization Notification Detail screen of the Web PAN. The Work Study Program code and the 18 character translation from the Code Translation Table (CTT) should be displayed below the 'Work Study Program' field label.

A change to the Work Study Program code should result in the display of before and after lines, marked with a '+' and '-', as is done for other distribution-level changes.
