

Release 1472
Service Request 80389
LOA Temporary Layoff Type Code

TEST PLAN

March 4, 2003

Information Systems & Computing
Office of the President
University of California

<u>TESTING OVERVIEW</u>	3
<u>LOAD CONTROL TABLE DATA BASE (LOADCTL)</u>	4
<u>LOAD EMPLOYEE DATA BASE (LOADEDDB)</u>	5
<u>ONLINE CICS TESTING</u>	6
<u>BATCH TESTING</u>	7

Testing Overview

This test plan addresses the test runs and cases constructed to verify the correct installation of Release R1472.

The test CTL supplied has the necessary table entries for testing the programs changed for this release.

The test EDB has employees with the new value ("17") in the *Leave of absence code* field. Most employees have no date.

The following are the two components of this test:

- 1) CICS test of the ELVE and UCI functions and an inquiry of employees to be updated later in this test process.
- 2) Batch reporting from PPP620 on Leave of Absence.

The tests will be performed in this order after the databases are loaded.

Page 4

LOA Temporary Layoff Type Code

March 4, 2003

Load Control Table Data Base (LOADCTL)

Load the DB2 CTL database.

Verification

Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base.

Load Employee Data Base (LOADEDDB)

Load the DB2 EDB database.

Verification

Ensure that the DB2 EDB has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base.

Online CICS testing.

The following script can be used to verify installation of changed maps and programs for the ELVE and EUCI functions.

1. Logon to CICS and access ELVE (Leave of Absence Data) screen with any active employee.
2. Put the employee on a non-paid leave of absence with a type of "17" (Temporary layoff) and Update.

Result: The value of "17" should be accepted.

3. Place the cursor on the value in this field on the screen and enter F1.

Result: If you scroll down to the bottom of help, you will see that there is a translation for value "17".

4. Now go to the EUCI (University Contribution Indicator (UCI)) screen for this employee. Set the employee up with a UCI Begin Date and End Date and a Code of "M" and Update.

Result: The input will be accepted.

Batch testing.

1. Run PPP620.

Result: Verify that:

- for the them employee you set up in the CICS testing portion of the document appears on the PPP6203 Report in the Leave of Absence Section.
- The leave type should be “Temporary layoff”. This verifies that the CTT was updated correctly.

As always, Campuses are encouraged to do their own testing.
