PPOT1511

The test JCL provided with this release can be used as a model to create the production one-time JCL.

PPP130

Modify the PPP130 JCL for the DD PPELGRPT for the benefits enrollment file. The LRECL must be changed from 70 to 71.

PPP650

The following DD Names are obsolete, and should be taken out of the JCL:

- EINCOMP
- DINCOMP
- ECMCURR
- ECMCONT
- DCMCURR
- DCMCONT
- EEXCURR
- EEXCONT
- DEXCONT

9. Install Control Table (CTL) updates into production.

Execute **PPP004** to process the following CTL transactions,

- DETPROD

Use the transactions in CARDLIB(DETPROD), or key from the provided facsimile UPAY553 form. These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.

10. Run one-time program PPOT1511 in non-update mode and review the results. When satisfied with the results, run one-time program PPOT1511 in update mode, which directly updates the employees' Primary BELI Status Qualification Code and/or Secondary BELI Status Qualification Code from a value of '10', '20', or '80' to an initial value of blank. The corresponding BELI Qualification Effective Date is initialized to a low-date of '0001-01-01'. Again, review the results. The EDB Change File is for reporting via PPP180, and for *auditing purposes only*. It should not be processed by PPP742.

11. Place new and modified objects in production.

12. Follow local procedures for distributing the modified form UPAY770.
