Installation Instructions

This document provides installation instructions for this release. Review these instructions carefully before proceeding with installation.

CICS Map Generation

1. Install the source code contained in DGIPNL for the **modified** maps.
2. Use SDF II option 6 to generate the BMS macros and the COBOL data structures for these Maps.
3. Assemble and link the BMS macros to produce the physical map descriptions used by CICS/BMS.

Map Name	DGIPNL Member	Installed?	Generated?	Assembled?
PPEUHDO	PPEUHDO			
PPEVHDO	PPEVHDO			
PPWHO0	PPWHO0			

Program Preparation

Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1. Install, compile and link the **modified** programs listed in the following table.
