# **Web Merit: Limits on Number of Rates**

## **Overview of Required Change**

Union contracts have recently introduced new step structures containing as many as 29 steps or 57 rates, which exceeded current rate entry limits in TCS of 18.5 steps or 36 rates.

Requirements dated May 26, 2004, described modifications to TCS which would allow for a new limit of 99 rate intervals. These modifications include changes to the TCS CICS update screen (TCSM074) to allow for entry of up to 99 rates; changes to TCSB383 COBOL program to allow passing of up to 99 rates to TCT; plus changes to the TCS Rule Detail screen in TCR (Title Code Range Adjustment System) to allow for replacement of up to 99 individual rates.

Changes are also needed for one PPS Web Merit program which has a limit of 40 pay intervals.

## **Web Merit Stored Procedure**

A stored procedure used by Web Merit, PPTCTSP2, has a limit of 40 pay intervals. This should be modified to allow for a limit of 99 pay intervals in order to match new rate limits being implemented in TCS.
