

Release 1589

**Service Request 80897
Web Merit - Limit on Number of Rates**

INSTALLATION INSTRUCTIONS

July 1, 2004
Enterprise IT Services
Office of the President
University of California

Installation Instructions

This document provides installation instructions for this release. Review these instructions carefully before proceeding with installation.

DB2 Installation

This portion of the installation creates DB2 objects.

1. Install the **modified** DDL member listed in the following table, replacing *COLLID* with the collection ID for Web Merit. The DDL member defines a stored procedure used by Web Merit. Once installed, DROP the procedure, and then execute the DDL member to create the new DB2 stored procedure. The CURRENT SQLID must be set to the value of *AUTHID* of the authorization ID that will own the Web Merit objects.

DDL Members	Installed?	Executed?
SPTCTSP2		

2. A DB2 stored procedure used by Web Merit have been dropped and recreated, so it is necessary to re-GRANT access for Web Merit. Install the **one-time** DDL member listed in the following table, replacing *WEBID* with the surrogate ID used for Web Merit. The CURRENT SQLID must be set to the value of *AUTHID* of the authorization ID that will own the Web EDB Inquiry objects. Once modified, execute the DDL member.

DDL Members	Installed?	Executed?
PPOT1589		

3. Once the stored procedures have been recreated with the DDL in step 2, the procedure must be started using the DB2 START command (from SPUFI or in batch) as shown below:

-START PROCEDURE (*AUTHID*.PPTCTSP2)

Replace *AUTHID* in the above commands with the value of *AUTHID* used in step 1.

Program Preparation

Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

1. Install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2?	Compile	Package Bind?	Done?
PPCTTSBE	Yes	Batch	No	
PPTCTSP2	Yes	SPAS	Yes	

Plan Binds

1. Bind the plan listed in the following table.

Bind Members	Done?
PPP004	

Table Update

Run PPP004 to update the following CTL table with the **release transaction**.

System Messages Table (08) - Use the transactions in CARDLIB (MSGPROD).
Modified error message for an invalid Staff Step/Scale Exception Flag

Testing

Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.
