Introduction

This document provides installation instructions for release 1594 to change the mapping for Separation Reason Code (EDB0141) value 'CF - Per Diem Release' to value '06 - Release' in the CPS employee File.

Please review these instructions carefully before proceeding with the installation.

Installation Sequence

1. Install for Testing:

- COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Modify, install, compile and link the modified program listed in the following table. If a BIND is required, it is indicated in the table under the heading "Bind".

PROGRAM	DB2 Pre-Compile	Compile	Bind	Done?
PPP711	Yes	Batch	Plan	

2. Execute and verify the rest of the test plan, per supplied instructions.

3. Perform any desired additional campus testing.

4. Install into Production:

- Install COBOL Program and Bind the Plan as described in the installation instruction above for the testing.

5. Startup Instructions

None.
