

Release 1647
Salary Rate Limitation

INSTALLATION INSTRUCTIONS

June 6, 2005

Enterprise IT Services
Information Resources and Computing
Office of the President
University of California

Introduction

This document provides installation instructions for release 1647. Please review these instructions carefully before proceeding with the installation.

Installation Sequence

1. Install the following new Bind members listed in the following table.

Copylib Members	Installed?
PPEC603	

2. Install the following modified Bind members listed in the following table.

Bind Members	Installed?
PPP080	

3. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

- a) Install, compile and link the **new** programs listed in the following table.

PROGRAM	DB2 Pre-Compile	Compile	Package Bind?	Done?
PPEC603	Yes	Dual	Yes	

- b) Install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2 Pre-Compile	Compile	Package Bind?	Done?
PPCTARTE	Yes	Batch	No	
PPEC052	Yes	Dual	Yes	
PPWECON	Yes	CICS	Yes	

4. Bind the following Plans.

Bind Plans	Done?
PPP004	
PPP080	

5. CICS Resource Definition Operations (RDO)

A Processing Program Table entry is required for the following Programs. The CICS Resource Definition Operations (RDO) are provided in CARDLIB(RDOPROD). Replace *GROUPID* with the campus group.

RDO Entry	Done?
PPEC603	

6. Execute and verify the rest of the test plan, per supplied instructions.

7. Perform any desired additional campus testing.

8. Place modified objects in production.

9. Install Control Table (CTL) updates into production.

Execute **PPP004** to update the following DB2 CTL tables with **release transactions**.

- Routine Definition Table (37) – Use the UPAY804 transactions in CARDLIB (RTDPROD).
- Processing Group Table (36) – Use the UPAY803 transactions in CARDLIB (PGTPROD).
- Data Element Table (06) – Use the UPAY553 transactions in CARDLIB (DETPROD).

- System Messages Table (08) – Use the UPAY554 transactions in CARDLIB (MSGPROD).
- Assessment Rate Table (42) – Use the UPAY870 transactions in CARDLIB (ARTPROD). Note that only one transaction is present and this is for the Salary Cap function (i.e., Benefit Assessment Type “CAP”). This transaction specifies Assessment Rate Code “FEDC” and identifies the 2005 annual limit of the Executive Level II of the Federal Executive Pay Scale.
- Fund Group Table (41) – The Fund Group Table is considered a “below the line” CTL table and as such, may be structured according to local FAU considerations. Use the UPAY866 transaction in CARDLIB (FNDPROD) as an example to create applicable update entries for the new Salary Rate Limitation function. Currently, the UCOP base function will only include Salary Caps associated with the Executive Level II of the Federal Executive Pay Scale (e.g., NIH and SAMHSA) which is indicated by Fund Group Code “FEDC”. Using the provided transaction as a template, enter all Funding ranges (identified in cols 15 through 25 as “LLLLL HHHH”) which are associated with this Salary Rate Limit. These entries should be provided/approved by your Payroll Manager.
