

**Release 1700**  
**GASB Statement #47, Voluntary and Involuntary**  
**Termination Benefits**

**INSTALLATION INSTRUCTIONS**

April 19, 2006

Enterprise IT Services  
Information Resources and Communications  
Office of the President  
University of California

## Introduction

This document provides installation instructions for release 1700. Please review these instructions carefully before proceeding with the installation.

## Installation Sequence

1. Install the **modified campus specific** copy member listed in the following table. **Do not overlay local values with Base values.** Modify the value clause labeled DOS-OLD-SEVERANCE to include the severance DOS codes currently in use at your campus.

Copylib Members	Installed?
CPWSDOSC	

2. Install the **new campus specific** copylib member listed in the following table. This Interface definition can be used to perform any campus specific remapping or masking of FAU codes to make the detail sort sequence, and control break totals more meaningful at each campus (see program PPFAU140 below). In the base UCOP process, PPFAU140 simply returns the same FAU that is entered.

Copylib Members	Installed?
CPLNF140	

3. Install the **new** bind member listed in the following table.

Bind Members	Installed?
PPP546	

4. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

**Note:** "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Install, compile and link the **new** programs listed in the following table.

PROGRAM	DB2 Pre-compile	Compile	Package Bind?	Done?
PPP546	Yes	Batch	No	
PPFAU140	Yes	Batch	No	

Install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2 Pre-compile	Compile	Package Bind?	Done?
PPEC052	Yes	Dual	No	
PPEDTPAY	Yes	Dual	Yes	
PPEDTRST	Yes	Dual	Yes	
PPEDTFT	Yes	Dual	Yes	
PPWRC11	Yes	Cics	Yes	
PPWRC21	Yes	Cics	Yes	

5. Bind the following Plans.

Bind Plans	Done?
PPP360	

6. Obsolete Objects

a) Bind Member

Follow local procedures for removing the obsolete bind member.

Bind Member	Done?
PPEC052	

b) DB2 Package

Follow local procedures for removing the package listed below. This may include freeing the package.

Package	Done?

Package	Done?
PPEC052	

7. Execute and verify the rest of the test plan, per supplied instructions.
8. Perform any desired additional campus testing.
9. Place modified objects in production.
10. Install Control Table (CTL) updates into production.

Execute **PPP004** to update the following DB2 CTL tables with **release transactions**.

- System Messages Table (08) – Use the UPAY554 transactions in CARDLIB (MSGPROD).
- Description of Services Table (10) – Use the UPAY650 transactions in CARDLIB (DOSPROD). Note be sure to replace question marks (???) with sequence numbers that works in your campus implementation, and making sure that card1 and card2 of the same transaction set get the same sequence number.
