1. Copylib Installation  
Install modified copylib **CPWSXIC2**.
2. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Install, compile, and link the program listed in the following table.

<b>Program</b>	<b>DB2?</b>	<b>Compile</b>	<b>Plan Bind?</b>	<b>Done?</b>
PPP420	Yes	Batch		

3. Bind the plan for PPP420
4. Perform installation verification testing as described in the Test Plan document. In addition, perform any further local testing.
5. Update production JCL – PPP420
  - Modify production JCL using the test JCL provided with this release as a model. Sample JCL is in PDS PAYDIST.1706R.JCL.
6. Install all components into production.
7. As part of every compute
  - The new Electronic Tab-delimited Report output file will be produced each time the execution of a payroll cycle, also known as the **Compute**.
  - The length of the new file is 80 and the record format is RECFM=FB. It will be the campus' responsibility to properly allocate space for this dataset during the ftp transfer. The file should be sent to vsftp.ucop.edu using the following file name:  
/ftphome/ftpusrn/put/hrb/FITSCACH.cp.Emmddy
    - 'n' is the one-byte campus ID.
    - 'cp' is the Pay Cycle.
    - 'mmddy' is the Check Date.
