Testing Overview

This test plan addresses the test runs and cases constructed to verify the correct installation of Release 1708. The test is made up of the following components:

1. Control Table Data Base (CTL) Initial Load (LOADCTL)
2. Employee Data Base (EDB) Load (LOADEDDB)
3. SX 2006 Wage Increase Reporting (RUNONET)

CONTROL TABLE (CTL) INITIAL LOAD (LOADCTL)

Description

This job loads the DB2 CTL database.

Verification

Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base. The members in PDS UDB2CTL already reflect the updates applied to the DB2 Control tables.

EMPLOYEE DATA BASE (EDB) INITIAL LOAD (LOADEDDB)

Description

This job loads the EDB database.

Verification

In order to assure successful completion of this job, verify that the EDB has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base.

SX 2006 Wage Increase Reporting (RUNONET)

Description

This job reports those employees who are eligible for the SX Range Adjustments on the SX one-time detail report. Thus a one-time detail report contains all eligible employees who received range adjustments. An electronic data file in tab-delimited format, containing the same data as on the "Central Office" detail report is also produced.
