

**Release 1713**

**Service Request 81451  
2006 Web Merit Enhancements Phase I**

**Service Request 81447  
2006 Web Merit Enhancements Phase II**

**Error Report 1982  
Column headings missing on Report PPP675**

## **INSTALLATION INSTRUCTIONS**

July 12, 2006  
Prepared by Janet Kennedy

Information Resources & Communications  
Office of the President  
University of California

## Installation Instructions

This document provides installation instructions for this release. Review these instructions carefully before proceeding with installation. Several of the Phase II requirements were included in this release but not all. The remainder will be released as soon as possible.

### *DB2 Installation*

This portion of the installation creates DB2 objects.

1. Install the **modified** DDL members listed in the following table, replacing \*AUTHID\* as necessary, with appropriate campus values.

DDL Members	Database	Installed?
PPPVMCC	PPPMRT	
TBMCC00C	PPPMRT	

2. Install the **new** table Alter DDL member listed in the following table.

DDL Members	Database	Installed?
TBMCC02A	PPPMRT	

3. The RC/Migrator strategy in ANALYSIS (R1713U) can be used to perform the above DB2 changes, or the environments may be updated using the DDL members. You should be aware that the strategies do not provide for local changes to referenced objects. If you do not wish to use the RC/Migrator strategy, skip this step and continue with Step 4.
  - Modify strategy member R1713U by replacing \*AUTHID\* with the appropriate campus value. Replace ‘PPPMRT’ with the local name, if different
  - Use RC/Migrator to execute the strategies. Skip the next step 4.
4. Alter table PPPMCC and associated views by executing the DDL members in the following order.
  - Execute DDL member TBMCC02A to alter Table PPPMCC.

NOTE: an alternative is to Drop Table PPPMCC and execute modified DDL member TBMCC00C to recreate the Table. If this is done, all Indexes and Views must be identified and recreated (and the Drop View in the next step can be skipped).

- Drop View (No DDL member has been provided for this)

PPPVMCC\_MCC

- Execute DDL member PPPVZMCC to create View PPPVZMCC\_MCC.
5. Install and run the following one-time DDL members below to delete the index PPPXMCC2 and to re-grant access on the dropped view used by Web Merit. Use appropriate campus values for \*AUTHID\* and \*WEBID\*.

DDL Members	Installed?	Executed?
PPO17131		
PPO17132		

### *Include Member Installation*

1. Install the **modified** include member listed in the following table.

Include Members	Installed?
PPPVZMCC	

### *Program Preparation*

Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

1. Install, compile and link the **modified** programs listed in the following table.

Program	DB2?	Compile	Package Bind?	Done?
PPP675	Yes	Batch	No	
PPTCTSP2	No	SPAS	No	
PPTCTSP5	No	SPAS	No	

### *Bind Plans*

1. Bind the plan listed in the following table.

Bind Members	Done?
PPP675	

### ***Obsolete Objects***

1. The following DDL member is now **obsolete**. Follow local procedures for removing this.

<b>DDL Members</b>	<b>Database</b>	<b>Done?</b>
IXMCC02C	PPPMRT	

### ***Install Web Merit Application (.ear – Enterprise Archive file or .war – Web Archive file)***

Download and install the .ear or .war file from the release dataset PAYDIST.R1713.MERITEAR or MERITWAR using binary FTP. For details on installation, please see the documentation for releases 1485 and 1668.

### ***Testing***

Perform installation verification testing as described in the Test Plan. In addition perform any further local testing.

### ***Install in Production***

Place modified objects in production.
