## ***Table Updates***

Run PPP004 to update the following CTL tables:

- Benefits Rates Table (CTL Table 14) - Update the production Control File (CTL) by executing PPP004 using the Benefit Rate Table (BRT) transactions supplied in CARDLIB member BRTPROD. The purpose of these transactions is to include the Regents Reduction along with the deduction rate set. These transactions update the “default” (Bargaining Unit “00”) rates contained on the Retirement portion of the BRT. Although the Effective Date of these transactions is notational (i.e., only one rate set per Bargaining Unit/Rep Code is permitted), the listing of these rates contains a break on Effective Date. Therefore, to increase the usefulness of the BRT report listing, a complete Retirement Rate set is provided for update using an Effective Date 06/30/05 (the prior rate set contained an Effective Date of “00/00/00” which the transaction edit will no longer permit).
- System Parameter Table (CTL Table 01) - Update the production Control File (CTL) by executing PPP004 using the System Parameter Table transactions supplied in CARDLIB member PRMPROD. The purpose of these transactions is to make available Parameter Numbers 246 and 250 which were previously used to specify the UCRP Regents Reduction Amount.

## ***Production Objects***

Place modified objects in production.
