Installation Instructions

This document provides installation instructions for this release. Review these instructions carefully before proceeding with installation.

DB2 Installation

This portion of the installation creates DB2 objects.

1. Install the **modified** DDL members listed in the following table, replacing *COLLID* with the collection ID for Web Merit. Each DDL member defines a stored procedure used by Web Merit. Once installed, DROP the procedure, and then execute the DDL member to create the new DB2 stored procedure. The CURRENT SQLID must be set to the value of *AUTHID* of the authorization ID that will own the Web Merit objects.

DDL Members	Installed?	Executed?
SPTCTSP2		
SPTCTSP5		

2. DB2 stored procedures used by Web Merit have been dropped and recreated, so it is necessary to re-GRANT access for Web Merit. Install the **one-time** DDL member listed in the following table, replacing *WEBID* with the surrogate ID used for Web Merit. The CURRENT SQLID must be set to the value of *AUTHID* of the authorization ID that will own the Web EDB Inquiry objects. Once modified, execute the DDL member.

DDL Members	Installed?	Executed?
PPOT1722		

3. Once the stored procedures have been recreated with the DDL in step 2, the procedures must be started using the DB2 START command (from SPUFI or in batch) as shown below:

```
-START PROCEDURE (*AUTHID*.PPTCTSP2)  
-START PROCEDURE (*AUTHID*.PPTCTSP5)
```

Replace *AUTHID* in the above commands with the value of *AUTHID* used in step 1.

Program Preparation

Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

1. Install, compile and link the **modified** programs listed in the following table.

Program	DB2?	Compile	Package Bind?	Done?
PPP675	Yes	Batch	No	
PPTCTSP2	No	SPAS	No	
PPTCTSP5	No	SPAS	No	

Bind Plans

1. Bind the plan listed in the following table.

Bind Members	Done?
PPP675	

Install Web Merit Application (.ear – Enterprise Archive file or .war – Web Archive file)

Download and install the .ear or .war file from the release dataset PAYDIST.R1722.MERITEAR or MERITWAR using binary FTP. For details on installation, please see the documentation for releases 1485 and 1668.

Testing

Perform installation verification testing as described in the Test Plan. In addition perform any further local testing.

Install in Production

Place modified objects in production.
