

Release 1741
Service Request 81540
Benefit Rates by Bargaining Unit – Phase III

Service Request 18727
PPS CPS Interface File/Monthly Reporting

Installation Instructions

November 27, 2006
08:00 AM
Prepared by J. Quan

Information Resources and Communications
Office of the President
University of California

Introduction

This document provides installation instructions for release 1741. Please review these instructions carefully before proceeding with the installation.

Installation Sequence

Copylib Member Installation

1. Install the modified COPYMEMBERS listed in the following table:

Copylib Members	Installed?
CPWSXECP	

COBOL Program Preparation

2. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: The "SPAS" designation indicates that a module needs to be compiled and linked into the appropriate SPAS loadlib. If only "SPAS" is indicated in the Compile column, then the module is either a called procedure, or only called by a stored procedure. The SPAS package bind differs from that used for CICS dual-use binds. If the SPAS application is running, a STOP and START PROCEDURE is required to install the new version.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

- a) Install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2 Pre-Compile	Compile	Package Bind?	Done?
PPP230	Yes	Batch	No	
PPP711	Yes	Batch	No	
PPIIVR	Yes	Batch	No	

Plan Binds

3. Bind the following Plans listed in the following table.

Bind Plans	Done?
PPP230	
PPP711	
PPIIVR	

JCL Changes

4. Add DDNAME of 'SORTWK01' and associated attributes to the JCL that executes PPP230.

PROGRAM	DDNAME	DDNAME Added in JCL?
PPP230	SORTWRK01	

Testing

5. Execute and verify the rest of the test plan, per supplied instructions.
6. Perform any desired additional campus testing.
7. Execute and verify the rest of the test plan, per supplied instructions.

Install in Production

8. Place modified objects in production
9. Month End Reporting Process

Create the JCL for program PPP230. The release JCL (RUN230) can be used as a sample.

The execution of program PPP230 should be run in the next scheduled Month End Reporting Process.

Control Table Updates

10. Install Control Table (CTL) updates into production.

Execute **PPP004** to update the following DB2 CTL tables with release transactions.

- System Messages Table (08)

Use the transactions in PAYDIST.R1741.CARDLIB (MSGPROD). These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.

- Code Translation Table (38)

Use the transactions in PAYDIST.R1741.CARDLIB (CTTPROD). These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.
