This release addresses the following Service Requests:

**Service Request 81765**

Service Request 81765 requests the addition of GTN 635 (Post-Doc supplemental disability) to the IVR deductions extract in order to allow online enrollment in Post Doc benefits.

GTN 635 was originally established by Release 1607; it did not include the YTD balance indicator. The YTD balance is not currently needed for the online enrollment in benefits; however, to be consistent with other benefits, a GTN table update to establish the YTD balance will most likely be provided at next calendar year end.

**Service Request 81561**

Service Request 81561 has made GTN 301 (Non-resident alien Federal tax rate pointer) obsolete; the first phase was Release 1721 and the second phase will include modifications to EDB Update and Inquiry. The removal of GTN 301 from the IVR deductions extract is included with this release.

**Programs**

**PPIIVR**

PPIIVR generates the Web/IVR extract file. It was modified to remove references to GTN 301.

**Copy Members**

**CPWSXIVR**

This copy member identifies and groups the GTNs to be selected for the IVR deductions file. It was modified to include GTN 635 and to remove GTN 301.

**Installation Instructions**

A separate Installation Instructions document has been provided.

**Test Plan**

A separate Test Plan document has been provided.

**Timing of Installation**

The timing of this release is **date mandated**. The first IVR deductions extract must be delivered to OP prior to January 31, 2007.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.
