This release addresses the following Service Request:

Service Request 81745

Release 1715 modified the UCRP basic retirement and DCP calculation to use the Employee Unit Code (EUC, DE0255) and the Employee Representation Code (ERC, DE 0295) instead of the BRSC for the employee rate look-up in the Benefits Rate table. Release 1735 introduced the Employee Benefits Eligibility Unit Code (EBEUC, DE0445) and the Employee Benefits Eligibility Representation Code (EBERC, DE0446) for use in the employee medical rate look-up in the Benefits Rate table.

Service Request 81745 asks for the modification of the UCRP rate look-up to use the EBEUC and the EBERC instead of the EUC and the ERC. In addition, the EBEUC and the EBERC are to be included in the monthly UCRS file maintenance interface.

Programs

PPBENUCR

PPBENUCR calculates the UCRP basic and DCP deductions. It was modified to use the EBEUC and EBERC instead of the EUC and ERC to read the DB2 PPPBRR table (the benefits rate table for retirement).

PPI740

PPI740 produces the UCRS file maintenance interface. It was modified to include the EBEUC and EBERC in the interface file and the history file.

PPNETCLC

PPNETCLC is called by PPP400 and PPRCNET to develop current deduction amounts which require special procedures or calculations. It was modified to pass the EBEUC and EBERC to PPBENUCR.

Beatrice Cardona, et al
March 5, 2007

PPNETUPD

PPNETUPD is called by PPP400 to perform special update procedures. It was modified to pass the EBEUC and EBERC to PPBENUCR.

PPOROVPY

PPOROVPY is the processing program for the online OVPY function. It was modified to read the PPPPEB DB2 table for the EBEUC and EBERC, and to use them to read the PPPBRR table for the UCRP rates.

Copy Members

CPLNKUCR

CPLNKUCR defines the LINKAGE area for PPBENUCR. It was modified to include the EBEUC and EBERC.

Installation Instructions

A separate Installation Instructions document has been provided.

Test Plan

A separate Test Plan document has been provided.

Timing of Installation

The timing of this release is **date mandated**. The modifications to PPI740 must be installed in time for the interface file to be produced for March 2007 Month End, but after the file has been produced for February 2007 Month End. The March Month End run will populate the history file with the EBEUC and EBERC values, and include them for everyone on the interface file.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.

If there are any questions, please send electronic mail to Caroline.Rider@ucop.edu, or call 949-837-1784.
