Re:	Release:	1780
	Service Requests:	81863
	Error Reports:	2091, 2093, 2105
	Programs:	PPEXERPT, PPP660, PPP882
	Copy Members:	CPWSXLIF
	Include Members:	None
	DDL Members:	None
	Bind Members:	PPP660
	CICS Maps:	None
	CICS Help:	None
	Forms:	UPAY823, UPAY927(New)
	Table Updates:	System Messages Table
	Urgency:	Not Urgent (see Timing of Installation below)

This release addresses the following:

### **Service Request 81863**

This request asks that the Social Security Number (SSN) be removed from reports PPP8821 and PPP8822. It also asks that the Most Recent Hire Date be added to reports PPP8821 and PPP8822. PPP8821 is the “Duplicate Insurance Coverage Report – Employee” and PPP8822 is the “Duplicate Insurance Coverage Report – Dependents”. It also requests that new options to sort reports PPP8821, PPP8822 and PPP6601 by Home Department Location Indicator be provided. PPP6601 is the “Executive Life Imputed Income Report”.

### **Error Report 2091**

Form UPAY823 contains run specifications for three programs: PPP880, PPP881 and PPP882. Program PPP880 was made obsolete in release 1281 in the year 2000, but the form was never modified to reflect this. The PPP880 run specification has been removed from UPAY823 form. In addition, messages for program PPP880 still appear on the PPPMSG table. Those messages have been deleted.

### **Error Report 2093**

In the analysis for SR 81863, it was discovered that report PPP8821 is sorted by employee name, but has a control break on employee ID. Although this is unlikely to ever cause a problem, they have been made consistent. A secondary sort key of employee ID has been added so that if there are two employees with the same name, the records are handled correctly.

### **Error Report 2105**

While testing the changes brought upon by SR81863, it was uncovered that the PPP8822 report does not display a dependent with duplicate insurance coverage when that dependent is the last record in the DEP table. PPP882 has been modified so that if the last record in the DEP table has a duplicate insurance coverage that dependent will be included in the PPP8822 report (“Duplicate Insurance Coverage Report – Dependents”).

## **Programs**

### **PPPEXERPT**

This program performs the imputed income and imputed income abeyance record processing. It creates the input file for PPP660. It was modified to populate the new Employee Home Department (EDB0114) field.

### **PPP660**

This program produces report PPP6601, the Executive Life Imputed Income report, using the executive life file produced by program PPP130 during monthly periodic maintenance.

It was modified to populate the new Home Department Location Indicator. An option was added to sort by Home Department Location Indicator. A new header for the Home Department Location Indicator was added. A page break for every change in Home Department Location Indicator was added and the page number will be reset.

### **PPP882**

This program was re-written to conform to current coding standards.

PPP882 creates two duplicate insurance coverage reports. Report PPP8821 is sorted by Employee Name + Employee ID and PPP8822 is sorted by SSN of dependents + Employee ID. For both reports, a new option was provided to sort by Home Department Location Indicator from the Home Department Table (HME).

The program was modified to remove the SSN which was printed on the PPP8821 and PPP8822 reports.

The report layout in working-storage was modified. PPP8821 was modified to replace the SSN with Most Recent Hire Date (EDB0113). PPP8822 was modified to remove the SSN and the remaining fields were repositioned. Additionally, the Most Recent Hire Date (EDB0113) was also added to both reports.

The internal sort file for PPP8821 was modified to add the Home Department Location Indicator field. A new internal sort file was created for PPP8822.

A new header for the Home Department Location Indicator was added which will be used when the new sort option has been requested. A page break for every change in Home Department Location Indicator was added and the page number was reset.

## **Copy Members**

### **CPWSXLIF**

This copy member contains the layout for the Executive Life Imputed Income Report data. RPT-EMPL-HOME-DEPT PIC X(05) and RPT-EMPL-HOME-DEPT-LOC-CODE PIC X(01) were added.

## **Bind Members**

### **PPP660**

This bind member was changed to add PPP660 as a DB2 program.

## **Forms**

### **UPAY823**

This form is the Dependent Enrollments Monthly Reports Program Run Specification.

A box labeled "Sort Option" was added to the end of the PPP882-SPEC portion of the specification record in column 18. The box gives the option to sort PPP8821 and /or PPP8822 reports by Home Department Location Indicator. It contains one of the following possible values:

- “D” Sort selected report(s) by Department Location Indicator.
- Blank Report 1 sort by Employee Name  
Report 2 sort by Dependent SSN.

The options for obsolete program PPP880 were removed from this form.

#### UPAY927 (New)

This new form is the Executive Life Imputed Income Reports Program Run Specification.

UPAY927 gives the option to print reports by Employee ID or Home Department Location Indicator:

- “D” Sort report by Department Location Indicator.
- Blank Sort report by Employee ID.

#### **Table Updates**

##### Systems Messages Table

This contains system messages used by programs. New systems messages for PPP882 and PPP660 were added. Systems messages used by PPP880 were deleted. Program PPP880 was made obsolete in release 1281 in the year 2000.

#### **Installation Instructions**

A separate Installation Instructions document has been provided.

#### **Test Plan**

A separate Test Plan document has been provided.

#### **Timing of Installation**

The timing of this release is **not urgent**.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.
