University of California

## **Introduction**

This document provides installation instructions for release 1797. Please review these instructions carefully before proceeding with the installation.

## Installation Sequence

### 1. Copylib Member Installation

1.1 Install the **new** Copymember listed in the following table:

Copylib Members	Installed?
CPWSSSNV	

### 2. Bind Member Installation

2.1 Install the **new** Bind member listed in the following table:

Bind Members	Installed?
PPP777	

### 3. COBOL Program Preparation

#### COBOL Program Installation:

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

**Note:** The "SPAS" designation indicates that a module needs to be compiled and linked into the appropriate SPAS loadlib. If only "SPAS" is indicated in the Compile column, then the module is either a called procedure, or only called by a stored procedure. The SPAS package bind differs from that used for CICS dual-use binds. If the SPAS application is running, a STOP and START PROCEDURE is required to install the new version.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

3.1 Install, compile, and link the **new** program listed in the following table:

<b>PROGRAM</b>	<b>DB2 Pre-Compile</b>	<b>Compile</b>	<b>Package Bind?</b>	<b>Done?</b>
PPP777	Yes	Batch	No	

#### **4. Plan Binds**

4.1 Bind the Plans listed in the following table:

<b>Bind Plans</b>	<b>Done?</b>
PPP777	

#### **5. Testing**

- 5.1 Execute and verify the rest of the test plan, per supplied instructions.
- 5.2 Perform any desired additional campus testing.

#### **6. JCL Updates**

6.1 Create JCL for the new program PPP777. The test JCL can be used as a model to create the production JCL. A sample of this JCL can be found in the PAYDIST.R1797.JCL (RUN777A or RUN7777B) library.

#### **7. Install in Production**

7.1 Place new objects in production

#### **8. Control Table Updates**

8.1 Install Control Table (CTL) updates into production

Execute **PPP004** to update the following DB2 CTL tables with release transactions.

- System Messages Table (08)

Use the transactions in PAYDIST.R1797.CARDLIB (MSGPROD). These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.
