Subject: Year-End Table Updates II

Earlier, we made available to you on the payroll FTP site, the 2009 Advance and Arrears Benefits Table Updates. At that time, we promised that we would make the 2009 Tax-year updates available as soon as possible. These are now available on the FTP site.

MRTAX08 is a single dataset which comprises the 2009 tax-year updates. This dataset must be processed after the final compute with a check date in 2008 and after the freeze of the EDB and CTL databases for year-end tax reporting, but before Periodic Maintenance to begin the new calendar (tax) year and Quarter 1. On the 2008 Year-End Processing Sequence, this is done in the step labelled "CTL Update: Apply Tax Table Updates".

MRTAX08 contains 256 transactions to add the 2009 Federal Tax, State Tax, and Federal EIC tables, as well as several transactions to update System Parameters, Gross-to-Net and foreign country code table entries.

Process dataset MRTAX08 through the CTL update stream.

As always, following the update of production control tables, we encourage campuses to make a backup, either an unload or an imagecopy, of the updated tables.

The dataset identified above is a member of the cardlib PAYDIST.CTL2008.CARDLIB on the Payroll FTP site.

Functional questions should be addressed to Carolyn Murray (510-987-0944; Carolyn.Murray@ucop.edu) of the Payroll Coordinator's Office

Technical questions may be addressed to me at Maxine.Gerber@ucop.edu.
