

**Release 1809**

**Service Request 81975  
2007 Merit Enhancements to Reports  
PPP6751 and PPP6761, Phase II**

**Installation Instructions**

March 13, 2008  
Prepared by Janet Kennedy

Information Resources & Communications  
Office of the President  
University of California

This document provides installation instructions for release 1809. Please review these instructions carefully before proceeding with the installation.

## ***1. COBOL Program Preparation***

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

- 1.1 Install, compile, and link the following **modified** program:

<b>PROGRAM</b>	<b>DB2?</b>	<b>Compile Type</b>	<b>Package Bind?</b>	<b>Done?</b>
PPP675	Yes	Batch	No	

## ***2. Plan Binds***

- 2.1 Bind the following plan:

<b>Bind Member</b>	<b>Done?</b>
PPP675	

## ***3. JCL Changes***

- 3.1 Add DDname WRNPRT for the new error report PPP6752 to the JCL for program PPP675. A sample of this JCL can be found in PAYDIST.R1809.JCL members RUN675A or RUN675B.

## ***4. Testing***

- 4.1 Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.

## ***5. Install in Production***

- 5.1 Place modified objects in production.
