This release addresses the following Service Request:

**Service Request 82143**

Service request 82143 asks for that objects associated with PAF generation be made obsolete.

This release renders obsolete all objects associated with PAF production. Primarily, this means that program PPP170 and table PPPRDT is now obsolete. All subroutines and related objects were made obsolete as well.

**Bind Members**

PPP004

PPP004 binds the plan for the control table update process. The following obsolete programs have been removed from the member list: PPCTR15, PPCTRDTE and PPCTRDTU.

**Forms**

UPAY907b

UPAY907b is used to generate control table report request transactions for program PPP004. "Table 15 Report Description Table" was removed from the list of valid tables.

**Table Updates**

PPPMMSG

PPPMMSG is the System Messages Table in the CTL database. Messages associated with newly obsolete programs were deleted. A list of the deleted messages follows:

17-010 CANNOT OPEN CONTROL FILE  
17-020 CANNOT OPEN DATA BASE  
17-030 CANNOT OPEN ACCOUNT, FUND, OR ACCT/FUND FILE  
17-040 CANNOT READ THE SYSTEM CONTROL RECORD FROM THE DATA BASE

01-165 RPT DESC TABLE: NON-NUMERIC EDIT NUMBER  
01-166 RPT DESC TABLE: NON-NUMERIC TRANSLATION LENGTH

PPPTOT

PPPTOT is the "table of tables" in the CTL database. It contains one row for each valid CTL table. The row for Table 15 was removed.

### **Obsolete Objects**

Many objects are to be made obsolete with this release. These are not listed here but can be found in the Installation Instructions Document. Follow local procedures for making these objects obsolete.

### **Installation Instructions**

A separate Installation Instructions document is provided for this release.

### **Test Plan**

1. Use JCL member LOADCTL to load the CTL database.
2. Use JCL member RUN004 to apply the transactions in CARDLIB(TRANSIN) to the CTL. This file contains transactions to update the (now obsolete) RDT table. Since the table is obsolete and related programs have been removed, the transactions will be rejected. Verify that the condition code is 0005 and that the following message appears in WRNRPT for each transaction:  
CT-012 5-TRAN REJECT SORT: Transaction table Number is invalid

### **Timing of Installation**

The timing of this release is **not urgent**. As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.
