

Release 1835

**Service Request 82242
Cal Casualty Electronic File**

Installation Instructions

September 15, 2008
Prepared by Caroline Rider

Information Resources & Communications
Office of the President
University of California

This document provides installation instructions for release 1835. Please review these instructions carefully before proceeding with the installation.

1. *Bind Member Installation*

- 1.1 Install the following **new** bind member:

Bind Members	Installed?
PPP491	

2. *COBOL Program Preparation*

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

- 2.1 Install, compile, and link the following **new** program:

PROGRAM	DB2?	Compile Type	Package Bind?	Done?
PPP491	No	Batch	No	

3. *Plan Binds*

- 3.1 Bind the following plan:

Bind Member	Done?
PPP491	

4. *JCL Changes*

- 4.1 Create JCL for the **new** program listed below. The test JCL can be used as a model to create the production JCL.

Program	Sample JCL	Installed?
PPP491	RUN491	

5. *Testing*

- 5.1 Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.

6. *Install in Production*

- 6.1 Place modified objects in production.
- 6.2 Set up JCL for Monthly Reporting that includes
 - a run of PPP490 with the provided parameter file (CARDLIB(CARD49CC) and the Monthly Merged PAR file
 - a run of PPP491 that uses the output DD TAPEFILE from the above run of PPP490 as the input DD TAPEIN
- 6.3 Send the PPP491 output DD TAPEOUT to UCOP no later than the 5th working day of the month. The file should be sent to vsftp.ucop.edu with the following file name:

/ftphome/ftpusr */put/car/CALCAS.*monyy*, where

* is the one-character campus ID (note that UCLA must not report Merced separately as location 10; the Merced data must be combined with UCLA and UCOP as location 4)

monyy is the standard three-letter month and two-digit year for Monthly Reporting

7. *Control Table Updates*

- 7.1 Execute **PPP004** to update the following DB2 CTL tables with release transactions.
 - **System Messages Table (08)** – Use the transactions in CARDLIB (MSGPROD).
