Batch Test Plan

LOADCTL: Control Table (CTL) Initial Load

Description

This job loads the DB2 CTL database. This CTL has been updated with the Control Table update transactions provided with the release.

Verification

Verify that the job has completed normally. Verify that all tables have been successfully loaded into the data base.

LOADEDDB: Employee Data Base (EDB) Initial Load

Description

This job loads the EDB database.

Verification

Verify that the job has completed normally. Verify that all tables have been successfully loaded into the data base.

RUN491: Monthly Cal Casualty Reporting File

Description

This job runs PPP490 and PPP491 to produce the California Casualty deduction reporting file. PPP490 uses the parameter file required to produce the file used by PPP491.

Verification

Verify that the job has completed normally.

Verify that the output file DD TAPEOUT matches the file provided with the release (CALCAS); it should include a header record, 17 detail records, and a trailer record. The SSN in the detail records (cols 19 to 27) should be all zeros.
