This release addresses the following Service Request:

Service Request 82245

Service Request 82245 asks that objects associated with Interim Carrier reporting be made obsolete.

Service Request 82245 provides the following background information:

Production of weekly hardcopy Interim Carrier Reports was discontinued in 2003, based on feedback received from the carriers. These reports were produced by base program series PPP566, PPP567, and PPP568 and sent to various insurance carriers. Although the programs involved in producing these reports were identified, these programs were never removed from Payroll. This causes overhead, as IR&C staff may encounter them during project analysis or identify them for global changes.

A complete list of objects being made obsolete is in the Installation Instructions document.

Table Updates

PPPMSG

PPPMSG is the System Messages Table in the CTL database. Messages associated with newly obsolete programs were deleted. A list of the deleted messages follows:
