This release addresses the following Service Request:

### **Service Request 82496**

Service Request 82496 requests that the leave DOS code type of distributions and the tax GTN types of deductions be available in the Corporate Personnel System in order to help facilitate the reporting and analysis of payroll data.

Currently the FCP-DOS leave (“LV”) types of distributions are excluded on the CPS distribution file. Also, for the BCS Deduction file, only Retirement (“R”) and Miscellaneous (“M”) GTN types are selected.

It is requested that changes be made to CPS interface process to:

- Include the leave type DOS distributions on the CPS Distribution file
- Include the tax (“T”) types of GTN deductions on the BCS Deduction file. This will cause the OASDI and Medicare deductions to be included on the file. Also, it is requested that data be added to the record found on this BCS file. This includes the GTN description, the GTN group code and the pay cycle end date of the deduction.

### **Programs**

#### **PPP713**

PPP713 creates the earnings and deductions interface files for the Corporate Personnel System (CPS) and the Benefits Counseling System (BCS). Changes were made to no longer exclude DOS “LV” types of distributions from the CPS Distribution file. Changes were made to add the selection of tax “T” types of deductions for the BCS Deduction file. This deduction file was 35 bytes long with 10 bytes of filler. This was not enough to accommodate the additional data requested for each record on that file. Therefore, the file was expanded to 80 bytes and now has a filler of 33 bytes and includes the GTN

Beatrice Cardona, et al

description, GTN group code and the pay cycle end date for the deduction. In order to obtain the GTN description the GTN is now loaded into a work area. In order to do, it was necessary to add a call to the GTN utility program PPGTNUT2 and all related code.

### **Copy Members**

#### **CPFDXDBC**

This copy member CPFDXDBC is the FD for the BCS deductions file. This copy member was modified to expand the record length to 80 bytes.

#### **CPWSXDBC**

This copy member CPWSXDBC defines the record layout for the BCS deductions file. This copy member was modified to expand the record length to 80 bytes. Added to the record were the GTN description of 15 byte, the GTN group code of 1 bytes and the pay cycle end date of 6 bytes formatted as yymmdd. The filler was expanded to 33 bytes.

### **Bind Members**

#### **PPP713**

Program PPGTNUT2 was added to the program list in the plan bind for PPP713.

### **Table Updates**

#### **System Messages Table**

This table contains all the PPS messages displayed in CICS and on all reports. Error message M71305, ERROR IN GTN TABLE LOAD, was added to the messages table with a severe 8-SEE OPERATN severity level. This is used if there is a problem with the call to the PPGTNUT2 program which loads the GTN table into a work area.

### **Installation Instructions**

A separate Installation Instructions document is provided for this release.

### **Test Plan**

A separate Test Plan document is provided for this release.

### **Timing of Installation**

The timing of this release is **date mandated**. This release should be installed after the monthly processing for the June pay cycles and before the monthly processing for July pay cycles.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.

If there are any questions, please send electronic mail to Janet.Kennedy@ucop.edu, or call (510) 587-6128.
