Re: Release: 1880
Service Requests: 82711
Programs: PPI441
Copy Members: CPFDXERS, CPWSXERS
Include Members: None
DDL Members: None
Bind Members: None
CICS Maps: None
CICS Help: None
Forms: None
Table Updates: None
Urgency: Urgent (see Timing of Installation below)

This release addresses the following Service Request:

Service Request 82711

Service Request 82711 asks that the Class Title Outline (CTO) be added to the extract file from PPS to the Effort Reporting System (ERS).

PPI441

PPI441 generates an extract file for ERS from the month-end PAR file. It has been modified to include the CTO data in the extract.

Copy Members

CPFDXERS

CPFDXERS is the file definition for the ERS extract. The record length was increased from 220 to 223 to accommodate the CTO.

CPWSXERS

CPWSXERS is the file layout for the ERS extract. The CTO was added to the end of the record.

Installation Instructions

Prior to installing this release, ensure that the latest build release of the currently running version is installed. See "Timing of Installation" for more details.

1. Copylib Member Installation

1.1 Install **modified** copy members:

Copylib Members	Installed?
CPFDXERS	
CPWSXERS	

2. COBOL Program Preparation

2.1 Install, compile, and link the following **modified** program:

PROGRAM	DB2?	Compile Type	Package Bind?	Done?
PPI441	Yes	Batch	No	

3. Plan Binds

3.1 Bind the following plan:

Bind Member	Done?
PPI441	

4. JCL Changes

Modify the JCL for DDname PPI441, for program PPI441. A sample of this JCL can be found in JCL member (RUN441). The LRECL was changed from 220 to 223.

Test Plan

1. LOADCTL: Control Table (CTL) Initial Load

Verification

Verify that the job has completed normally.

2. LOADEDDB: Employee Database (EDB) Initial Load

Verification

Verify that the job has completed normally.

3. LOADPAR: PAR Initial Load

Verification

Verify that the job has completed normally.

4. RUNI441: Generate ERS Extract

Verification

Verify that the job has completed normally. Machine compare output ERS file with the ERSEXTRX file provided with the release. There is sample JCL to do this using COMPAREX in JCL member COMPARE. Note that these files have record length = 223, whereas the previous version had length = 220.

Timing of Installation

The timing of this release is **urgent** . Campuses must coordinate the installation of this change with the installation of ERS release 10.2, targeted for the end of September. Do not install ERS release 10.2 until after this PPS release has been installed.

If the campus does not plan to install ERS R10.2 immediately, then prior to installing this release, ensure that the latest build release of the currently running version is installed. The new builds will be available at the same time that release 10.2 is available, and will be at these levels:

- 9.3 B011
- 10.0 B011
- 10.1 B003

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.

If there are any questions, please send electronic mail to maxine.gerber@ucop.edu, or call 510-987-0422.

Maxine Gerber
