**Generic Full Accounting Unit  
Installation Instructions**

## **Installation Instructions**

This document provides installation instructions for this release. Review these instructions carefully before proceeding with installation. It is especially important to review the DB2 structure changes and the procedures that should be followed.

Release 1113 (Committed Salaries) issued copymember CPWSFAUR, which is essential for this release. If Release 1113 has not been installed, then install copymember from that release, along with modifications from this release.

## *DB2 Changes*

**Due to the fact that tables are being dropped and recreated, rather than altered, some installation steps and testing steps must be coordinated. Specifically, the first steps of the Test Plan which load the test databases and unload some table data for conversion must be executed prior to beginning the DB2 changes.**

### **Procedure Overview**

The DB2 changes involve the redefinition of columns, and therefore require the dropping and recreation of the tables. For tables that are not in the PPPCTL database, the previous data must be unloaded prior to the DDL work, the data converted, and then reloaded after the DDL work is complete. The process for each DB2 table is separate. The basic procedure for each table is:

- 1) Unload the existing table data (see JCL(UPREVxxx) where xxx is the database).
- 2) Make any necessary local changes and install the appropriate one-time conversion program.
- 3) Run the one-time program to convert the unloaded table data to the new format (see JCL(CONVxxx)).
- 4) Perform all the DDL work for the table.
- 5) Run an unload to create a \$\$LOAD member for the new table format (see JCL(U\$\$xxx).
- 6) Reload the table using the converted data and the new \$\$LOAD format (see JCL(RLOADxxx).

The conversion of the VSAM CTL tables occurs in two programs, which convert the RESTORE file itself rather than the VSAM CTL. The basic procedure is:

1. Backup the VSAM Restore file.
2. Make any necessary local changes and install the one-time conversion program.
3. Run PPO1138G and PPO1138L to convert the RESTORE table data to the new format.
4. Run PPP150 to load the VSAM CTL with the converted RESTORE.
5. Perform all the DDL work for the PPPCTL tables.
6. Run PPP851 to update the DB2 CTL from the VSAM CTL.

## Unload Tables

1. Create a copy of the VSAM CTL Restore file which will be converted. This affects all the PPPCTL database tables.
2. PPP640 loads, reports from, and deletes the PPPLVL and PPPLLI DB2 tables. Complete a full cycle of PPP640 processing so that the subsequent dropping of the PPPLLI table will not destroy any needed data.
3. Unload the following DB2 tables. The one-time programs, and the provided sample JCL, expect to read and create fixed length records which match the Base table row lengths. If there are local changes to the Base rows or local procedures use variable length records, the JCL and one-time programs must be adjusted for the correct DCB information.

Table	Database
PPPABD	PPPABY
PPPABE	PPPABY
PPPABF	PPPABY
PPPGTNH	PPPCDB
PPPAWR	PPPEDB
PPPDIS	PPPEDB
PPPFBA	PPPEDB
PPPTOE	PPPETH
PPPAWD	PPPHDB
PPPDST	PPPHDB
PPPERN	PPPPAR
PPPEUD	PPPPAR
PPPLLI	PPPPCD
PPPTHA	PPPTHF
PPPTHF	PPPTHF
PPPTIM	PPPTHF

**DDL Member Installation**

1. Install the **modified** DDL Table members listed in the following table.

Modified DDL Members	Table	Database	Installed?
TBABD00C	PPPABD	PPPABY	
TBABE00C	PPPABE	PPPABY	
TBABF00C	PPPABF	PPPABY	
TBAPU00C	PPPAPU	PPPCTL	
TBAWD00C	PPPAWD	PPPHDB	
TBAWR00C	PPPAWR	PPPEDB	
TBCRA00C	PPPCRA	PPPCTL	
TBCST00C	PPPCST	PPPCTL	
TBDIS00C	PPPDIS	PPPEDB	
TBDST00C	PPPDST	PPPHDB	
TBDUA00C	PPPDUA	PPPCTL	
TBDUC00C	PPPDUC	PPPCTL	
TBERN00C	PPPERN	PPPPAR	
TBEUD00C	PPPEUD	PPPPAR	
TBFBA00C	PPPFBA	PPPEDB

<b>Modified DDL Members</b>	<b>Table</b>	<b>View</b>	<b>Installed?</b>
PPPZWSF	PPPWSF	PPPZWSF_WSF	
PPPZWSP	PPPWSP	PPPZWSP_WSP	

\*In the Base environment this view contain FAU subunit references and is below-the-line. A campus that is not using the BASE FAU will need to install the appropriate changes. Indexes, which were not changed with this release, will also require changes.

## DB2 Changes

1. The RC/Migrator strategy in ANALYSIS(R1138U) can be used to perform the DB2 changes, or the environments may be updated using the DDL members which were also provided. You should be aware that the strategies do not provide for local changes to referenced objects. If you do not wish to use the RC/Migrator strategy, skip this step and continue with Step 2.
    - a) Modify strategy member R1138AU by replacing “\*AUTHID\*” with the appropriate campus value. Replace “PPPEDB” and “PPPHDB” with the local name of the databases to be updated.
    - b) Modify strategy member R1138BU by replacing “\*AUTHID\*” with the appropriate campus value. Replace “PPPCTL” and “PPPCDB” with the local name of the databases to be updated.
    - c) Modify strategy member R1138CU by replacing “\*AUTHID\*” with the appropriate campus value. Replace “PPPETH” with the local name of the databases to be updated.
    - d) Modify strategy member R1138DU by replacing “\*AUTHID\*” with the appropriate campus value. Replace “PPPABY” and “PPPPCD” with the local name of the databases to be updated.
    - e) Modify strategy member R1138AU by replacing “\*AUTHID\*” with the appropriate campus value. Replace “PPPPCD” and “PPPPAR” with the local name of the databases to be updated.
  - b) Use RC/Migrator to execute the strategies.
  - c) Skip steps 2 through 4 and proceed with \$\$LOAD for New Formats.
2. Drop the following tables (same as the modified tables list above). This will also drop the associated Indexes and Views.

Dropped Table	Database	Dropped?
PPPABD	PPPABY	
PPPABE	PPPABY	
PPPABF	PPPABY	
PPPAPU	PPPCTL	
PPPAWD	PPPHDB	
PPPAWR	PPPEDB

## Convert Data with One-Time Programs

**At this time, the one-time programs and related objects, which are included in “one-time” subsections in later COBOL, Copymember, etc. sections, must be installed. In addition, some modified non-one-time copymembers and Include members must also be installed for use by the one-time programs.**

The one-time programs, and the provided sample JCL, expect to read and create fixed length records which match the Base table row lengths. If there are local changes to the Base rows, the program file definitions and the JCL must be adjusted to the new row record length. If local procedures create variable length records within a PDS, as for example the test EDB databases sent with releases, then further changes are required in the record definition in the one-time programs. This installation also includes three programs used in *Convert Other Files*.

1. Install the one-time copymembers in *Copylib Member Installation*.
2. Install the one-time binds in *Bind Member Installation*.
3. In addition, the following modified non-one-time copymembers must be installed.

Copymember	Installed?
CPPDXDC3	
CPWSFAUR	
CPWSGTNH	
CPWSRAWD	
CPWSRAWR	
CPWSRDIS	
CPWSRDST	
CPWSRFBA	
CPWSXDC3	
CPWSXHCU	
CPWSXWSP	

4. In addition, the following modified non-one-time Include members must be installed.

Include Member	Installed?

**Generic Full Accounting Unit  
Installation Instructions**

<b>Include Member</b>	<b>Installed?</b>
PPPVZABD	
PPPVZABE	
PPPVZABF	
PPPVZFND	
PPPVZTHA	

5. Install and prepare the one-time programs in *Program Preparation*.

1. Create the one-time JCL in JCL.

1. Run the one-time programs to convert the DB2 table data.

<b>Run One-Time Program</b>	<b>Table</b>	<b>Database</b>
PPO1138A	PPPDIS	PPPEDB
PPO1138B	PPPDST	PPPHDB
PPO1138C	PPPFBA	PPPEDB
PPO1138D	PPPERN	PPPPAR
PPO1138E	PPPTOE	PPPEH
PPO1138F	PPPEUD	PPPPAR
PPO1138H	PPPABD	PPPABY
PPO1138I	PPPABE	PPPABY
PPO1138J	PPPABF	PPPABY
PPO1138K	PPPTH	PPPTHF
PPO1138M	PPPAWR	PPPEDB
PPO1138N	PPPAWD	PPPHDB
PPO1138P	PPPGTNH	PPPCDB
PPO1138S	PPPTHF	PPPTHF
PPO1138T	PPPTIM	PPPTHF

2. Run one-time programs PPO1138G and PPO1138L to convert the VSAM Restore file.

**Page 18**  
**Generic Full Accounting Unit**  
**Installation Instructions**

<b>Run One-Time Program</b>	<b>VSAM Table</b>	<b>Database</b>
PPO1138G	VSAM Restore File: PPPAPU, PPPGTN, PPPHCU, PPPWSP	PPPCTL, via PPP851: PPPAPU, PPPGTN, PPPHCU, PPPHCA, PPPWSP, PPPWSF
PPO1138L	VSAM Restore File: PPPCRA, PPPCST, PPPFND, PPPLAT	PPPCTL, via PPP851: PPPCRA, PPPCST, PPPFND, PPPLAT, PPPLAF

## Reload the Converted Data

1. Load the following tables using the converted data output from the one-time programs and the \$\$LOAD definitions created in the new format.

Reload Table	Database	Loaded?
PPPABD	PPPABY	
PPPABE	PPPABY	
PPPABF	PPPABY	
PPPAWD	PPPHDB	
PPPAWR	PPPEDB	
PPPDIS	PPPEDB	
PPPDST	PPPHDB	
PPPEUD	PPPPAR	
PPPERN (references EUD)	PPPPAR	
PPPFBA	PPPEDB	
PPPGTNH	PPPCDB	
PPPLLI	PPPPCD	
PPPTHA	PPPTHF	
PPPTHF	PPPTHF	
PPPTIM	PPPTHF	
PPPTOE	PPPEH	

2. Run PPP150 with the converted Restore file as input to load the VSAM CTL file.
3. Run PPP851 to load the following DB2 tables from the VSAM CTL. PPP851 handles the referential order.

Reload Table	Database	Loaded?
PPPAPU	PPPCTL	
PPPCRA	PPPCTL	

**Generic Full Accounting Unit  
Installation Instructions**

<b>Reload Table</b>	<b>Database</b>	<b>Loaded?</b>
PPPCST	PPPCTL	
PPPDUA*	PPPCTL	
PPPDUC*	PPPCTL	
PPPFND	PPPCTL	
PPPGTN	PPPCTL	
PPPHCA	PPPCTL	
PPPHCU	PPPCTL	
PPPLAF	PPPCTL	
PPPWSF	PPPCTL	
PPPWSP	PPPCTL	

\*although PPPDUC and PPPDUA are not changed on the VSAM file, there is some alteration performed by the new version of PPP851.

## **Convert Other Files**

1. Run PPCNVPAR to convert all PAR files.
2. Run PPO1138O to convert the IAP Balance file, if necessary.
3. Run PPO1138Q to convert the PPP530 Financial Reversal File, if necessary.
4. Run PPO1138R to convert the Financial Aid YTD file, if necessary.
4. Run PPO1138U to convert the PPP530 TOE Update file, if necessary.

## *CICS Map Generation*

1. Install the source code contained in DGIPNL for the **modified** maps.
2. Use SDF II option 6 to generate the BMS macros and the COBOL data structures for these Maps.
3. Assemble and link the BMS macros to produce the physical map descriptions used by CICS/BMS.

Map Name	DGIPNL Member	Installed?	Generated?	Assembled?

PPO1138O	
PPO1138Q	

**One-Time Bind Members**

## *Program Preparation*

**Note:** At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

**Note:** “DUAL” programs must be compiled twice and linked into batch and online libraries (“LOADLIB” and “OLOADLIB” respectively). “CICS” programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. “BATCH” programs must be compiled once and linked into the batch LOADLIB only.

1. Install, compile and link the **modified** programs listed in the following table.

Modified Program	DB2?	Compile	Package Bind?	Done?
PPACTION	YES	DUAL	PACKAGE	
PPAPORUP	YES	CICS	PACKAGE	
PPAPTDPT	YES	DUAL	PACKAGE

PPOT1154	Lump Sum payments via AP trans	PPOT1154	
PPOT1169	TX Base Pay Chngs Reporting trans	PPOT1169	

***Install in Production***

1. Run PPP010 to update the following VSAM CTL tables:

Data Element Table: Either key from the provided UPAY553 form facsimile, or use the transactions in CARDLIB(DET1138).

System Messages Table: Either key from the provided UPAY554 form facsimile, or use the transactions in CARDLIB(MSG1138). Also apply CARDLIB(MSG1142) or UPAY554 facsimile as per Release 1142.

Fund Group Table: Obtain from the Payroll Office and key UPAY866 transactions to update the 'UIRATE' and 'UIDFLT' Grouping Definition records on the PPPFND table. The transactions update the Group Text fields with matching Unemployment Insurance Balance Sheet FAU's. Do **not** use the transactions in CARDLIB(FND1138); local FAU's may differ.

Entries for the Fund Grouping Definition "BNOFFSET" are not created automatically by one-time program PPO1138L and must be entered by local update (UPAY866). They define funding qualifications for special staff benefit offset charges (i.e., 19900 funding) and are not required for campuses which do not employ this special benefit funding. For campuses that do use this funding, a "BNOFFSET" entry should be created for each Fund or Fund Range which qualifies for the funding (e.g., 19900-19900); refer to the source code in your pre-Release 1138 version of PPP530 for these Funds (see code just prior to EXIT-2189). An example of these updates are contained in CARDLIB (FNDTEST). Also note that Account Number conversion for these staff benefits was previously hardcoded in Section DAVIS-STAFF-ACCT-CHANGES-2196 or Section SF-STAFF-ACCT-CHANGES-2198 (for UCD or UCSF, respectively). These Account Number conversions are now contained in module PPFAU106. The base version of PPFAU106 contains the Account Numbers thought to be related to the UCSF campus. However, the local pre-

**Generic Full Accounting Unit  
Installation Instructions**

Release 1138 version of PPP530 should be examined and the associated Account Numbers should be applied to the local version of PPFAU106.

Report Definition Table: Obtain from the Payroll Office and key UPAY572 transactions to define the FAU fields for the Personnel Action Form(PAF) on the PPPRDT table. Do **not** use the transactions in CARDLIB(RDT1138); local PAF's may differ.

System Parameter Table: If your campus utilizes staff benefit offset charges for 19900 funds, update System Parameter #159 to a value of '1' as per the provided UPAY559 form facsimile or the transaction in CARDLIB (PRM1138). Otherwise (your campus does not utilize staff benefit offset charges for 19900 funds), System Parameter #159 should be set to a value of zero. Note that the easiest way to determine whether or not your campus employs staff benefit offset charges is to examine your pre-Release 1138 version of PPP530. The base source code just prior to EXIT-2189 essentially indicates that when the Location is 2 (UCSF) or 3 (UCD) then perform SPCL-FUND-BENE-OFFSETS-2192 when the Fund is 19900 or perform GENERAL-BENE-OFFSETS-2194 when the Fund is not 19900. Both UCSF and UCD employ staff benefit offset charges; therefore, for these campuses, System Parameter #159 should be set to a value of '1'. For other campuses, if local code in this area has been modified to achieve the same logic, then your campus also employs staff benefit offset charges, so the parameter should also be set to '1'. Otherwise, System Parameter #159 should be set to a value of zero.

Also apply System Parameter 160 as per Release 1142; this parameter affects processing in PPP535. If the local FAU structure is the same as the Base FAU structure, use the Release 1142 UPAY559 form facsimile, or use the transactions in CARDLIB(PRM1142). If NOT using the Base FAU structure, change the parameter transaction value to "1".

2. Run PPP851 to update the following DB2 CTL tables.

Data Element Table (06)

System Messages Table (08)

Fund Group Table (41)

3. Run PPP006 to update the following DB2 tables.

Data Element to Screen Table: Either key from the provided UPAY815 form facsimile, or use the transactions in CARDLIB(DES1138).

4. Use the UHDE online function to update the History Data Element Table (PPPHDE).

Delete, or make obsolete distribution FAU data elements 2042, 2044, 2045, 2046 and 2048 (PPPDST table). Change the FAU data element 2043 to define its length as 30 and its title as Full\_Acct\_Unit.

Change the Award Source data element 0745 ( PPPAWD table) to define its length as 30.

**Generic Full Accounting Unit  
Installation Instructions**

4. Update the production JCL.
5. Install all the objects in Production.
6. Run all the one-time programs to convert the data.
7. On its regular schedule, run PPP640 in "Refresh" mode with the new format of the PAR file. This will load data into the new PPPLLI table format.
7. Redefine data entry instructions/procedures for new transaction formats.
8. Distribute the new forms per local procedures.

## ***Obsolete***

Follow local procedures to remove the following obsolete objects.

- 1) Copymembers
