

Planned Web Releases for 2011

Notes

Enhancements to the base Effort Reporting System (ERS) are released quarterly. Additional builds may be provided between releases to address critical bug fixes.

The PPS web application suite includes Web Merit, Web PAN, Web EDB Inquiry, and Web EDB Update (New Hire, EDB Changes). There will be one release per quarter for one of the PPS web applications, based on relative priority.

Patch releases for the corporate Title Code System (TCS) web applications will be scheduled as needed depending on the severity of the error reported.

Target Release Date	Application	Description of Proposed Changes	Actual Release Number/Date
