

## **VENDOR CONTRACTS UNIVERSITY OF CALIFORNIA**

This report contains information on University of California contracts and purchase orders with vendors during the period March 2009 to December 2009. Contracts and purchase orders with a value of \$50,000 and above are included.

This information reflects spending across the University of California system on purchases of goods and services, including the University's medical centers, student housing and dining operations, research enterprise, and campus student services.

Also included are contracts the University enters into for vendors to provide campus services such as janitorial/custodial, training, laundry, advertising, printing services, and others.

The University of California's total budget, from all sources for all operations, is \$20 billion per year. The University works very hard to obtain the best possible pricing from vendors, leveraging its size and statewide scope. The institution and its campuses have aggressive strategic sourcing programs to obtain the highest quality products and services at the least possible cost. Additional information is available at [www.ucop.edu/purchserv/](http://www.ucop.edu/purchserv/).
