Notes on Data: The number of identified eligible high schools has increased each year. The historical UC admit rate is the average admit rate (admits/graduates) from 1998-2000. New schools are excluded from the historical admit rate section. Small schools average less than 10 graduates per year, thus are not easily categorized. One participating school is in Nevada, thus did not get an area classification. The Nevada school was asked to participate because CA students attend the school.

Source: The UC undergraduate admissions data for 2001 and 2002 were finalized in January 2002 and January 2003, respectively. The 2003 data are from the June 2003 extract, and will continue to be updated. The three ELC data extracts were last updated in May, 2003. The numbers of 1998-2000 graduates were obtained from the CDE's School Information Form A files from 6/22/99, 4/02/99, and 5/10/00, respectively.

Notes on data: ELC students are sometimes not admitted if they apply as transfer students or campuses don't receive complete materials in time for processing during the regular admissions cycle. Net applications exclude cancelled applications and thus may vary from total applications reported elsewhere. Total admits include Spring rollover admits for Fall applicants and thus may vary from Fall admits elsewhere.

Notes on Data: Due to multiple applications, details from each campus do not add up to the system-wide total. The system-wide enrollment rates are higher than campus rates because students with multiple admission offers can only enroll at one campus. Net applications exclude cancelled applications and thus may vary from total applications reported elsewhere. Total admits include Spring rollover admits for Fall applicants and thus may vary from Fall admits elsewhere.
