Notes: Policy benchmarks are defined in Appendix 2. Returns for periods less than one year are not annualized. TRIP FYTD return information is since inception (8/1/2008). Market values include accrued income except for STIP's asset value which is stated at amortized book value plus accrued interest. The method of rounding may produce the appearance of minor inconsistencies in various totals and percentages, but the differences do not affect the accuracy of the data.

1. Total Assets include Other Endowments, CAM, and HIP assets and is net of the STIP balances in other portfolios.
2. UC Entity benchmark is a blend of the indexes within the benchmarks of the funds in the table above, each weighted by the percentage it represents in the total assets.

- For 5 and 10 year periods returns were reclassified to match current asset classes.
- Inception date for Global Equity was July 16, 2008.
- See Private Equity Performance information on page 10 for comparison of Private Equity to multiple performance metrics.
- Performance benchmarks for periods less than three years are not relevant for the Absolute Return asset class.
- The Private Real Estate portion of the UCRP is shown lagged one quarter, in order to fully reflect both the income return and capital gains of the Real Estate investment as of December 31, 2008. The (time weighted) return shown is a weighted sum of the Open End and Closed End actual time weighted returns, and the benchmark is a weighted sum of the NCREIF Funds Index - Open End Diversified Core Equity and the actual time weighted return of the UC Closed End funds. This is consistent with investment guidelines and also the reporting of Private Equity performance (see also page 10). Prior to Q4 2007, the benchmark was strictly NPI. Inception date for Public Real Estate was September 1, 2008. The Public Real Estate benchmark is not lagged. See Appendix 2.

I. Performance Objectives

1. UCRP annualized total return (net of manager fees and expenses) was -7.51% over the past three years and -1.16% over the past five years, in comparison to the Plan's actuarial rate of return of 7.5%.
 2. The Consumer Price Index over the past 3 year and 5 year periods was 2.12% and 2.57% respectively.
 3. UCRP annualized total return underperformed its policy benchmark by 7 bp over the three year period and outperformed its policy benchmark by 16 bp over the five year period.
- II. For information on the portfolio's risk exposures see page 6, and for information on risk limits, see the separate quarterly risk report slides 10 and 11. During the past quarter, the portfolio's total risk was similar to the budget and within allowed ranges. The portfolio's active risk of 184 bp was well below the targeted range; the increase over last quarter was due to the equity underweight and increased equity volatility.
- III. Net investment expenses incurred by the Treasurer for managing the public securities (excluding Alternatives: Private Equity, Absolute Return, and Real Estate) of the UCRP were (expressed as a percent of assets at 3/31/09) -1.2 bp for the quarter (not annualized) and -9.1 bp for the preceding 12 months. Earnings from the Securities Lending program (which were significantly higher than last year) are added back to the portfolios from which the securities were lent, contributing to higher performance and offsetting other costs.

IV. UCRP Asset Allocation and Guideline Compliance

The UCRP portfolio complies with policy guidelines unless an exception is noted below.

* Policy Ranges, Targets and Allocations were approved by The Regents on September 17, 2008 and were effective on October 1, 2008. Combined Policy Ranges: Public Equity 55%-69%, Fixed Income 22%-32%, and Alternatives 5%-15%.

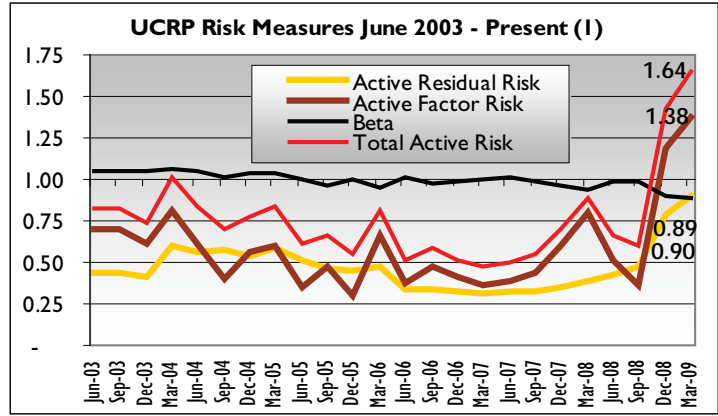

** As a result of extreme market volatility in October, the COI temporarily widened the policy ranges for total public equity from $\pm 7\%$ to $\pm 10\%$, for total fixed income from $\pm 5\%$ to $\pm 10\%$ until further notice. This change was reported at the November 11, 2008 COI meeting.

Results shown are based on (a) total fund composition as of quarter end and (b) long term volatility and correlation estimates for 21 risk factors (market benchmarks).
 1. Risk estimates are in units of standard deviation, annualized (range of likely results over one year horizon).
 2. Factor exposures for each portfolio are estimated by regressing monthly returns over all risk factors.
 3. Factors grouped into 5 broad categories; e.g., Domestic Equity consists of 6 risk factors. Non Marketable includes PE and RE factors.
 4. Risk contributions for each factor are derived by a weighted sum of the covariances of that factor with the total fund.
 5. Benchmark is the policy weight adjusted for illiquidity, and is comprised of actual weights for private equity, real estate, and absolute return.

1. Month-end holdings-based portfolio data used. Data, analytics source: MSCI/Barra, Inc. Total UCRP bond risk as of 3/31/09 was 5.77% (annualized standard deviation) compared to the benchmark (Citigroup LPF) total risk of 6.71%.

2. Core Fixed Income portfolio is managed in three core sectors: Government, Credit and Collateral. Total active risk is measured relative to its overall benchmark, the Citigroup LPF. Each core sector's active risk is assessed against the corresponding Citigroup LPF sector index. Total active risk as of 3/31/09 for the UCRP Core Fixed Income portfolio was 166 bps (annualized standard deviation).

*The UCRP and GEP Active U.S. Public Equity Portfolios are similar in composition (managers and weightings) so this report applies to both Funds. Active U.S. Public Equity as of 3/31/09 includes eight active large capitalization and six active small capitalization portfolios.

1. The benchmark for Active US Equity is the Russell 3000 tobacco free index.

2. Risk factor exposures and risk estimates are based on actual holdings as of 3/31/09 using proprietary data and analytics from MSCI/Barra, Inc.

3. Performance covers the period 1/01/09 to 3/31/09 (single quarter, not annualized). Performance attribution is based on month end holdings using a buy-hold methodology. Calculated returns will differ slightly from the official performance report, which is based on linked daily returns.

4. Style factor exposures are expressed as % Standard Deviation (annualized).

5. Industry sector exposures are expressed in terms of percent weights.

6. MCTR = Marginal Contribution to Total Risk, is a risk sensitivity measure. It approximates the change in portfolio total risk that results from a 1% change in the factor exposure.

Performance evaluation and benchmarking of Private Equity investments

The Office of the Treasurer uses industry standard metrics (Net Internal Rate of Return, or Net IRRs) to evaluate performance of individual PE funds. Long-term (10 years) time weighted returns of the PE program are compared to relevant market indexes. The use of Net IRRs is mandated by the CFA Institute for calculating and reporting PE performance. Meaningful performance can only be evaluated at the end of a fund's life. Net IRRs cannot be compared to time weighted returns (e.g., market index).

Table 1 is provided to aid in the evaluation of UC's PE program, and to supplement the time-weighted returns which have been reported in the past (see Table 2 below). In Table 1, PE funds are grouped by Vintage Year, showing Contributions, Distributions and estimated remaining Net Asset Value (NAV). Performance is compared to the Venture Economics All Private Equity Universe fund median IRR ("Benchmark"). UC Fund and Benchmark IRRs are weighted by the dollar amount of contributions into the fund (i.e., the investment base). The column "Weighted Excess Return" is the difference between the Weighted Vintage Net IRR and the Weighted Benchmark Net IRR, and is a measure of Fund selection skill. The last column, "Multiple" shows the ratio of Distributions + NAV to Contributions, and is another measure of Fund value added.

Table 1 shows data as of December 31, 2007, the latest period for which fund information is available. This information will be updated annually.

UC Data reported as of March 2009 corresponding to benchmarks as of December 2008.

The benchmarks shown in Table 2 are for informational purposes only and are not The Regent's policy benchmark. There is no appropriate market based index which can be used as a meaningful performance benchmark for Private Equity. This information is provided to give additional insight into Private Equity sector performance relative to multiple performance metrics.

1. Custom Private Equity Index (including international) consists of a weighted average of 80% Russell 3000 TF Index and 20% MSCI Emerging Market Free Index, plus 3%. The Custom Index is lagged by three months since inception.

- For 3, 5 and 10 year periods returns were reclassified to match current asset classes.
- Inception date for Global Equity was July 16, 2008.
- See page 10 for additional comparisons.
- Performance benchmarks for periods less than three years are not relevant for the Absolute Return asset class.
- The Private Real Estate portion of the UCRP is shown lagged one quarter, in order to fully reflect both the income return and capital gains of the Real Estate investment as of December 31, 2008. The (time weighted) return shown is a weighted sum of the Open End and Closed End actual time weighted returns, and the benchmark is a weighted sum of the NCREIF Funds Index - Open End Diversified Core Equity and the actual time weighted return of the UC Closed End funds. This is consistent with investment guidelines and also the reporting of Private Equity performance (see also page 10). Prior to Q4 2007, the benchmark was strictly NPI. Inception date for Public Real Estate was September 1, 2008. The Public Real Estate benchmark is not lagged. See Appendix 2.

GENERAL ENDOWMENT POOL (GEP)

I. Performance Objectives

1. GEP annualized total return (net of manager fees and expenses) was -4.66% over the past three years and 1.51% over the past five years and underperformed its policy benchmark by 145 bp and 49 bp respectively.
 2. The Consumer Price Index over the past 3 year and 5 year periods was 2.12% and 2.57% respectively.
- II. For information on the portfolio's risk exposures see page 13, and for information on risk limits, see the separate quarterly risk report slides 19 and 20. At the end of the quarter, the portfolio's total volatility was similar to the budget, and was within the allowable range. Active risk increased to 2.5%, still under the budgeted level of 3%, mainly due to the equity underweight and the volatility of Absolute Return Strategies relative to its cash based benchmark.
- III. Net investment expenses incurred by the Treasurer for managing the public securities (excluding Alternatives: Private Equity, Real Estate, and Absolute Return) of the GEP were (expressed as a percent of assets at 3/31/09) 0.6 bp for the quarter (not annualized) and -2.8 bp for the preceding 12 months. Earnings from the Securities Lending program (which were significantly higher than last year) are added back to the portfolios from which the securities were lent, contributing to higher performance and offsetting other costs.

IV. GEP Asset Allocation and Guideline Compliance

The GEP portfolio complies with policy guidelines unless an exception is noted below.

 * Policy Ranges, Targets and Allocations were approved by The Regents on September 17, 2008 and are effective October 1, 2008. Combined Policy Ranges: Public Equity 37%-51%, Fixed Income 15%-25%, and Alternatives 30%-40%.

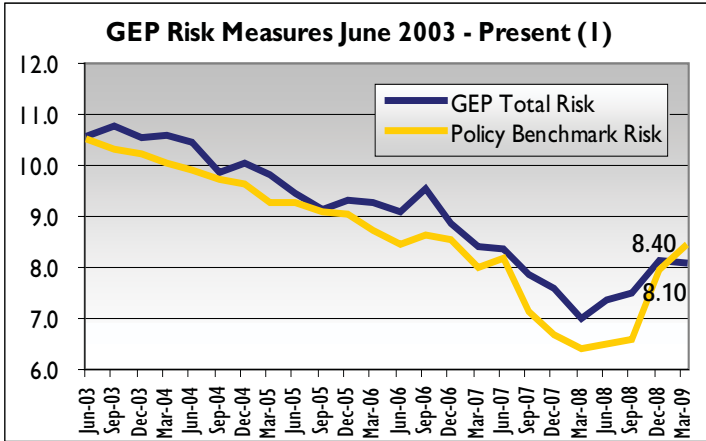

** As a result of extreme market volatility in October, the COI temporarily widened the policy ranges for total public equity from $\pm 7\%$ to $\pm 10\%$, for total fixed income from $\pm 5\%$ to $\pm 10\%$ until further notice. This change was reported at the November 11, 2008 COI meeting.

TOTAL	100.0	100.0	(0.0)

Results shown are based on (a) total fund composition as of quarter end and (b) long term volatility and correlation estimates for 21 risk factors (market benchmarks).

1. Risk estimates are in units of standard deviation, annualized (range of likely results over one year horizon).

2. Factor exposures for each portfolio are estimated by regressing monthly returns over all risk factors.

3. Factors grouped into 5 broad categories; e.g., Domestic Equity consists of 6 risk factors. Non Marketable includes PE and RE factors.

4. Risk contributions for each factor are derived by a weighted sum of the covariances of that factor with the total fund.

5. Benchmark is the policy weights adjusted for illiquidity, and includes actual weights for private equity and real estate.

ABSOLUTE RETURN PORTFOLIO RISK CHARACTERISTICS March 31, 2009

Notes on Guidelines as of quarter end: Gross accounting leverage of the portfolio was 1.65x, well under the Guideline limit of 4.5x; Concentration of risk in any single manager's portfolio does not exceed the Guideline limit of 15% of the risk budget; and Aggregate Forecast downside risk was 5.5% vs. Guideline limit of 5.0% (although both realized volatility and realized downside risk remained elevated at 11.0% and 11.1% respectively).

1. Market value in each of four broad strategies permitted in the Investment Guidelines (as amended November 12, 2008).
2. Additional detail of current investments by strategy.
3. Aggregate exposures to systematic risk factors as determined by statistical analysis and current holdings.
4. Forward estimate of risk, considering both current systematic exposures and the historical volatility of residual returns.
5. Monthly returns compared to official, style (systematic risk) benchmarks, and HFR Fund of Funds median return.

Note: Performance benchmark changed March 1, 2009 from Tbills +450 bp to 50% HFRX AR Index + 50% HFRXMD Index. This is shown in Charts 4 and 5 as if it had been in place during the entire period.
