NAV (12/31/2007)	\$13.82
Investment Category	Blend
Net Assets (\$M)	\$1,171
Inception	April 1, 2004

Risks to You

Please refer to the Equity Fund, Bond Fund and TIPS Fund profiles for further information on the specific investment objectives, strategies, returns and risks associated with those Funds.

Risks include market risk, credit risk, interest rate risk, individual company risk and foreign security risk. TIPS offers investors some protection against the loss of value due to inflation; however, these securities may lose value during periods of deflation. When you redeem your units, they may be worth more or less than the amount you had invested in them, which means you could lose money.

The Balanced Growth Fund may be appropriate for investors, at all points in their careers, who are seeking growth with moderate market risks. Investors with longer time horizons looking to maximize principal growth to fund retirement may want to use this Fund.

For more information on risk, see the "Investment Risk Factor Guide," available online at www.netbenefits.com.

Average Annual Total Returns

as of 12/31/2007

Overall total return is a function of the investment performance of the component funds. The UC Balanced Growth Fund started operations on April 1, 2004. Therefore, long-term performance information is not yet available. See Quick Stats for more information.

Returns (%)	1 Year	3 Years
Balanced Growth Fund	7.44	8.60
Policy Benchmark	6.97	8.35

How We Invest

Contributions are invested according to a fixed ratio: 65% Equity Fund, 30% Bond Fund and 5% TIPS (Treasury Inflation-Protected Securities) Fund. The Balanced Growth Fund's asset allocation is similar to the broad asset allocation of the University of California Retirement Plan (UCRP).

The Fund is rebalanced as needed. This prevents the three component funds from growing outside their allocation percentage. The Treasurer's Office manages the component funds according to the investment objectives and strategies of those funds.

Fees and Expenses

Investor expenses are limited to 0.15% (or \$1.50 per \$1,000 invested) of the Fund's average market value per year, assessed on a daily basis (1/365th per day invested). These expenses are not billed to participants, but are netted against the investment experience of the fund. These expenses are comprised of approximately 0.03% for investment management, 0.02% for investor education and 0.10% for administration (including accounting, audit, legal, custodial and recordkeeping services). The total administrative expenses are estimated and could actually be lower in some periods. If actual administrative expenses are less than estimated, any accumulation will be returned to the Fund each quarter, on a prorated basis, thereby lowering the effective expense ratio for participants. There are no front-end or deferred-sales loads or other marketing expenses.
