PURCHASING SOFTWARE FOR YOUR DEPARTMENT

UCOP departments frequently determine a need for software to support specific work or initiatives.

The good news is UCOP already has an agreement in place with SHI International Corp., a global provider of information technology products and solutions. SHI provides a wide array of software; and purchasing through the SHI agreement is a much more efficient option than contracting with individual suppliers directly.

Key benefits of using SHI include:

- Pre-established pricing.
- Pre-established agreement. No need to review an agreement with separate terms and conditions for individual software suppliers. The SHI agreement already covers terms and conditions in compliance with UCOP needs.
- Faster overall turnaround. The department will get the software in place and the work started more quickly.

Find out if SHI will meet your software needs!

Simply reach out to the IT Service Desk via Service Now. Once you’re on the ServiceNow homepage, navigate to: Request Service > Work Equipment: Computers, Phones and Software > Software Requests > Software request. In the Request Information fields, enter the software needed, quantity, and the technical contact in your department for the purchase.
