

**San Francisco**

**Long Hospital 4th Floor Hybrid Operating Room & Intraoperative MRI**

**FY of Approval:**

**2014-15**

**Project Description**

- Project provides two new spaces on the 4th floor of Long Hospital at the Parnassus Heights campus.
- The first space is a new, hybrid operating room. The hybrid operating room combines a traditional OR with imaging equipment to achieve real-time images during procedures as well as allow for minimum invasive surgeries. This brings a coordinated approach to cardiac procedures formerly provided in two separate areas in the hospital.
- The second space is an intraoperative magnetic resonance imaging (IOMRI) suite to scan images pre- and post-surgery

**Project Scope Summary**

ASF	3,941
GSF	5,436

**Summary of Budget by Fund Type**

Hospital Reserves	\$	23,200,000
<b>Total Budget</b>	<b>\$</b>	<b>23,200,000</b>
