

Davis University Tower Basement Central Processing Unit (Sacramento Campus)

Fiscal Year 2015-2016

Project Description

- * Increases the cleaning and sterilization capacity of the UC Davis Main Hospital by reactivating 7,400 square feet of outmoded central processing space located in the basement of the University Tower.
- * Upgrades space to current code necessary to meet current and future demand of operating room surgical procedures.
- * Replaces old sterilization equipment, improving temperature controls, bringing the area to current code via utilities improvements and fire egress improvements, and upgrading the information technology infrastructure. Includes alterations to the plumbing and waste removal systems, and new flooring.

Project Scope Summary

ASF	7,400
GSF	TBD
