

Practice P.A.S.S! Pull, Aim, Squeeze and Sweep!

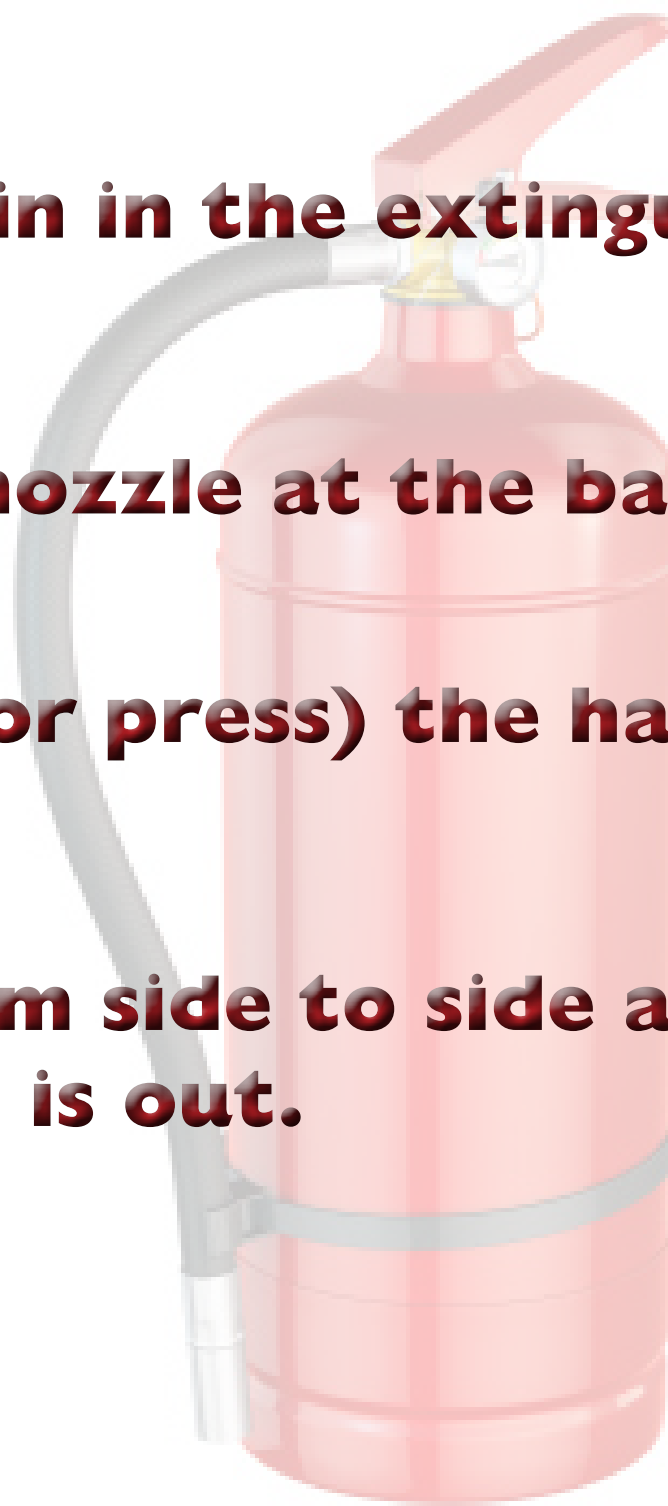

To manage a small fire, have a clear exit behind you, and only if you know how to use a fire extinguisher, remember P.A.S.S.:

Pull the pin in the extinguisher's handle.

Aim the nozzle at the base of the flames.

Squeeze (or press) the handles together.

Sweep from side to side at the base of the fire until it is out.

It's important to contact the Fire Department, even if you think the fire is out. The Fire Department will make sure the fire is completely out. And, don't forget to replace the fire extinguisher!
