

UC and the Federal Government

The federal government is an essential partner to the University of California, helping ensure that UC is an economic and innovation engine for California and the nation. The federal government provides support for UC in three crucial areas: student financial aid, research, and health care delivery and training. These funds help UC educate our nation’s workforce, advance scientific and technological breakthroughs, and provide world-class medical training and patient care.

Together, UC, the federal government and the state of California open doors of opportunity for the next generation.

Federal financial aid at UC

UC combines federal, state and university aid — along with contributions from students and their families — into a comprehensive package that helps ensure that cost is not a barrier to enrollment and graduation for our 233,000 undergraduate students.
