

HERBICIDE-FREE CAL CAMPAIGN

By: Mackenzie Feldman (Global Food Initiative Student Ambassador) and Bridget Gustafson

Making the green spaces on the campus of UC Berkeley chemical-free

REDUCE

By working with the grounds managers on campus, we have gotten the carcinogenic herbicide Ranger banned from the Clark Kerr Beach Volleyball Courts, and then went on to get all herbicides (including Surflan and Turflon) banned from Memorial Glade and Faculty Glade. In June, with the help of a 10k grant, a representative from Beyond Pesticides visited Berkeley to teach the groundskeepers how to maintain an herbicide-free campus.

WORK DAYS

We planned two community work days that involved 20+ students working alongside the groundskeepers of Cal to prepare the foundation of an herbicide-free Cal through sheet mulching and weeding.

ENGAGE

Our signage and stickers will engage the community to ensure this project will maintain interest and support until its completion.
