# ARTIFICIAL INTELLIGENCE USE AT UC
UCUES RESULTS

65% of students reported using AI tools in academic settings in Spring 2024. However, notable variation exists in AI usage among different sub-populations.

78% of international students have used AI tools, compared to 72% of Asian and 56% of URG students.

71% of male students have used AI tools, compared to 63% of female students and 45% of non-binary students.

68% of non-Pell recipients have used AI tools, compared to 61% of Pell recipients.

78% of engineering and computer science students have used AI tools.

80-90% of students indicated at least some agreement that they understood the appropriate use of AI tools for completing their coursework, that their professors had discussed this topic, and that they understood how AI tools could both assist and hinder their learning.

TOP THREE REASONS OF AI USE

- to brainstorm for a writing project or presentation
- to research a topic
- to study for exams
