Yes. I sometimes pay over \$100 for experiments before I can get reimbursed.
Beyond monthly "general health care costs," I spend \$60/month for mental health care costs (ie. 1 therapy session/week with a \$15 co-pay). The majority of my graduate student colleagues are also seeking mental health care 2-4 times/month.

International students have to pay for 1 credit for an internship during summer. Most schools do not require graduate students to pay this. This fee is only applicable to students pursuing internships to succeed in their careers and not to those who are travelling to home country or staying on campus. Because of that 1 credit, the student also has to pay for ARC fees. This seems unfair.

Extracurriculars: \$200
I have pets and their food is very expensive... We spend \$150-\$300 on food for them every month and about \$85 on a wellness plan that allows us free vet visits... Plus medication cost for them is about \$136 per month and about \$180 for shots per year. Santa Cruz is very expensive to live and I have to support 3 pets and a husband on \$1985 a month when rent is \$1720 that is ridiculous. If I had know about the expenditures of coming to this school I probably would never have come here. Which is sad because this is an amazing opportunity... But paying \$1720 to live in a garage and the very expensive health care system is crippling.

Electricity bill is not included in the rent (all other facilities are)
Gift, holiday shopping

We have a car that we use for other transport (getting kids to school, groceries, etc); I take shuttle to school, but that's the only public transport we use. Also, I listed our groceries expenses, but we do get food stamps that cover a significant portion of that (between \$400 and \$500 per month).

Cost of having a girlfriend

Living alone as a single person, even in poorly administered semi-official graduate housing, is unjustifiably unaffordable, with 70%+ percent of stipends going to rent, if you are lucky (in official housing, there are mandatory roommates and higher rates unless you are verifiably cohabiting -- this somewhat discriminatory arrangement providing a hefty subsidy to couples (so not quite a marital status distinction) definitely helps people get stuck in relationships they don't really want, and leads to incidents of misrepresentation to get affordable private units). Market rate here is closer to 95% of graduate income, admittedly. My ability to live at home is a blessing (i.e., I can afford to save, and cover emergency expenses), but continuing to do this into my mid-twenties has certainly done irreparable harm to my work and my quality of life. I urge the UC to investigate the professionalism and the competence of those employed in its housing departments, as their poor planning effectively steals from the University by a number of routes.
