University of California - Staff Workforce Profile 2018

Executive Summary

The annual *University of California (UC) Staff Workforce Profile* is a resource for workforce planning and talent management efforts at UC. The UC system is vast and diverse, employing more than 157,000 nonacademic staff (faculty and other academic employees excluded) at UC's ten campuses, five medical centers, Office of the President, division of Agriculture and Natural Resources, and many other programs and institutions across the state.

What has changed?

- The methodology used to determine ethnic background has been revised to more accurately reflect the self-identification ethnicities from CPS.
- The Retirement Horizon chart was updated to show age groups and years of service without making any ties to the retirement benefit eligibility. This is due to the changes made to the retirement horizons. The visual now highlights the age ranges and years of service for all eligible personnel groups.
- The color palette used in the portfolio is aligned with the UC brand guidelines.

2018 Staff Workforce Trends

The 2018 edition continues to surface many of the similar trends reported over the past several years.

- Hiring of career staff has slightly decreased to 12,187 hires in the fiscal year 2017-2018, down nearly 600 from previous fiscal year. Hiring rates show a similar pattern of decline across most of the personnel programs except MSP senior professionals.
- The University has continued to make strides towards reaching the goal of increased representation of racial and ethnic groups that have been historically underrepresented.
- Overall representation of female staff at UC remains consistently high across most of the staff categories. Female representation remains below parity only in the senior management ranks. However, SMG female representation has slightly improved from the previous year.
- The systemwide separation rate rose slightly to 9.2% in fiscal year 2017-2018, up 0.1% from previous fiscal year. Nearly 22.9% of career staff separations were for retirement. The UC has an aging workforce, with one-third of career staff already at or reaching retirement age within next decade.
- While 17.9% of separations were explicitly to accept other job opportunity and another 3.6% were due to a transfer to other UC locations. 16.1% of separations were resignations by employees who did not give a reason. Collectively, this group represents a significant number of departures and may be due to lack of job satisfaction and/or a wealth of opportunities in the job market.

For More Information

An electronic version of this dashboard, along with other staff and workforce data, is available at: www.ucop.edu/institutional-research-academic-planning/content-analysis/employees/. The dashboard is a collaboration between Institutional Research and Academic Planning and Systemwide Human Resources Talent Management at the UC Office of the President. For questions about this dashboard, please contact Donna Salvo, Executive Director of Systemwide Talent Management (donna.salvo@ucop.edu).
