

UNDERGRADUATE USERS

Total : **30,738** | **18%** of Undergraduate users | All undergraduates

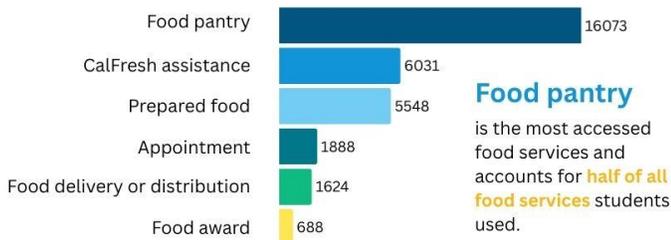

Service utilization by campus

Utilization of different basic needs services

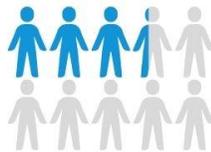

³ Utilization of various food services

Service utilization among undergraduate students who are food or housing insecure

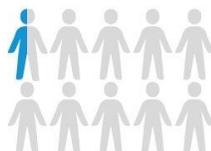

33%

of undergraduate students who are **food insecure** accessed basic needs food services

3%

of undergraduate students who are **housing insecure** accessed emergency housing services

GRADUATE USERS

Total : **3,985** | **9%** of Graduate users | All graduate students

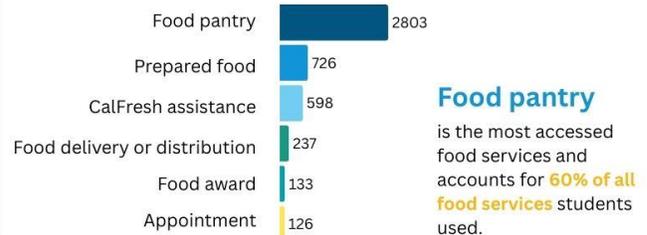

Service utilization by campus

Utilization of different basic needs services

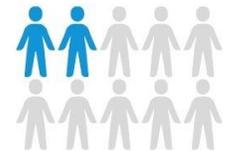

³ Utilization of various food services

Service utilization among graduate students who are food insecure

20%

of graduate students who are **food insecure** accessed basic needs food services

There is insufficient data to determine the proportion of housing-insecure graduate students who accessed emergency housing services. Measures of food and housing insecurity data is derived from anonymous, voluntary student experience surveys. The number of graduate students who both completed the survey and used housing services was substantially limited.

In this infographic, demographic distributions of service users are compared to the distributions of the overall undergraduate or graduate student population to indicate who are overrepresented among service users and are more likely to seek basic needs services on campus.

Who tends to use basic needs services

86%

of undergraduate users are **CALIFORNIA RESIDENT**, compared to **80%** of all undergraduates

33%

of undergraduate users are **HISPANIC/LATINO**, compared to **23%** of all undergraduates

5%

of undergraduate users are **AFRICAN AMERICAN**, compared to **4%** of all undergraduates

63%

of undergraduate users are **WOMEN**, compared to **53%** of all undergraduates

2%

of undergraduate users are **NONBINARY**, compared to **1%** of all undergraduates

17%

of undergraduate users are **BISEXUAL, GAY/LESBIAN**, compared to **13%** of all undergraduates

36%

of undergraduate users are **18 or 19 YEARS OLD (YOUNGER)**, compared to **28%** of all undergraduates

43%

of undergraduate users are **PELL RECIPIENTS**, compared to **31%** of all undergraduates

44%

of undergraduate users are **FIRST-GENERATION**, compared to **34%** of all undergraduates

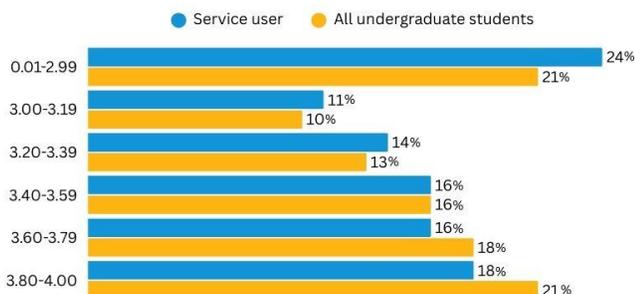

77%

of undergraduate users **ENTERED UC AS FRESHMEN** (vs. transfer), compared to **75%** of all undergraduates

GPA

Undergraduate students with **LOWER GPA (< 3.40)** are more likely to use services than those with higher GPA.

Who tends to use basic needs services

46%

of graduate users are **INTERNATIONAL STUDENTS**, compared to **30%** of all graduate students

13%

of graduate users are **HISPANIC/LATINO**, compared to **11%** of all graduate students

5%

of graduate users are **AFRICAN AMERICAN**, compared to **4%** of all graduate students

51%

of graduate users are **WOMEN**, compared to **38%** of all graduate students

2%

of graduate users are **NONBINARY**, compared to **1%** of all graduate students

8%

of graduate users are **BISEXUAL**, compared to **6%** of all graduate students

33%

of graduate users are **20-24 YEARS OLD (YOUNGER)**, compared to **25%** of all graduate

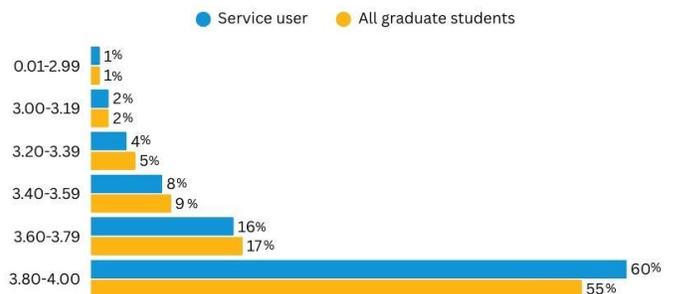

70%

of graduate users are **IN ACADEMIC DEGREE PROGRAMS**, compared to **54%** of all graduate students

GPA

Graduate students with **HIGHER GPA (> 3.79)** are more likely to use services than those with lower GPA.

Note

¹ The percentages are undergraduate or graduate student users out of the undergraduate or graduate student population on each campus.

² Case management refers to students requesting or being connected to advising for basic needs support.

³ Food service breakdowns are reported because there are a wide range of services and many users.
