Supplier Explorer

Why use it?

- **LOOK UP YOUR SUPPLIERS**

- Suppliers used by your company
- Shared supplier lists for specific commodities
- Check up on status of suppliers for reporting

- **FIND NEW SUPPLIERS**

- Add suppliers to meet diversity requirements
- Build Pre-qualified diverse supplier lists

- **GET UPDATES ON YOUR DIVERSE SUPPLIERS**

- Notifications on changes
- New certifications or status changes

- **TRACK SUPPLIERS YOU MEET**

- Add to “My Suppliers” list
- Follow suppliers for updates

Explorer Professional- Product Enhancements

New Vendor Layout

- Displaying information in a logical, tabular format vs. a single scrollable page.

Enhanced Supplier Discovery

- “**Power-Search**” Functionality in Explorer Professional.
- **TrustIQ** is now live! Have confidence that the suppliers you find are up to the job!

Explorer Professional- Power Search

POWER SEARCH: Enhanced and Robust *product-based* search.

Power Search utilizes information from the digitized indexing of over 1M+ diverse suppliers' website.

What does it mean for users?

When searching in Explorer, not only are you searching for products/services of which we have tie to the vendor profiles in Explorer, but you are also searching through their websites for related product/service information.

How often is the information updated?

Each quarter supplier.io will index information from vendor's websites. We can only do this for vendors with which we have their website/URL stored.

Will users see a difference in the system?

This enhancement involves no UI changes. But rather the vendors included in a search result will now include vendors that have similar products/services listed on their website.

Explorer Professional- TrustIQ

TrustIQ can help you find “qualified” vendors easily.

TrustIQ scores help evaluate a supplier’s ability to deliver products and services to corporations. The score ranges from 1 to 5, with 5 being the highest. This score is calculated using [supplier.io’s](#) proprietary data and US Business Census data.

A company’s TrustIQ is calculated using three factors:

- 1. Experience:** How many large companies are known to utilize the company? The higher the score, the more experience the company has doing business with corporations.
- 2. Stability:** How long has the company been in business? Older firms tend to display greater stability, and have higher scores.
- 3. Size:** How large is the supplier? Larger suppliers have higher scores. This can be useful when scale is important in an engagement.

Note: TrustIQ should not be interpreted as a predictor of a company’s past, present, or future performance.

Stability This company has been operational over 15 years. The average projected 3-year survival rate such companies is over 88%

Scale This business has more than 1000 employees. Fewer than 0.25% of US firms grow to this size.

This company has experience in the following industries
